Hello like i said in the last post, is an error made when the thread design was made, will be fixed asap ?

DrWhatNoName - July 14, 2018, 12:13 pm

Since your thread design is down, can you put up a wall of text which explains your product, as atm your threads has zero infomation about what your selling.

There are quite a lot of looking for crypters that work well with native miners.

It is important that it be FUD runtime and kept long enough until the stub update.

Could I send the miner for you to test if it is FUD runtime?

Then I would buy it like other users.

Sir fud runtime and fud scantime depend on how you (and other custome) spread , thats a shared stub like all other sellers do.

we provide new stub every 24 hours.

If you don't know Stub password mean you aren't in our room... because password is always pinned... and if you don't have Stub how you crypt your payload and get "heavy detection" ? Please PM me your username / id .

I haven't blocked no one btw...

A crypter that gives you confidence when you explore it. Every time you use it. it gives you a brand new good results

Menace 2 Society - October 9, 2018, 3:08 pm

Hello guys, today I want to give my honest opinion about the YAKUZA USG CRYPTER.

People wake up, you are all sleeping.

I saw a lot of shit crypters passing by the past years, but this crypter is ?

Most of the crypter owners are givin you crypt-to-go options and good luck.

Now you are disappointed because of the results and supports tell you to f*** off.

Not this one my friends. This crypter is so complex, I have to say "Only for smart guys."

Don't ask about runtime scantime nonsense. If you are looking for a Native crypter, that is aggressive like a ninja ?

Well this is the right place and your money worth it.

The Yakuza support team is always on standby mode whenever you need it. (Other sellers don't give such a support)

Owner is verry skilled, talented and dedicated to his work.

This is no marketing talk, this is real talk my friends. See it with my own eyes and have learned much.

Go buy this Native crypter and join the Yakuza Group. You will not get disappointed, I can guarantee you that.

Want to join the Yakuza Group? Feel free to get a taste of the pie.

Alright. This crypter is not for kiddies, if you don't know how to use it, then i am sorry for your intelligence. Crypter is mad afk. I have used it in the past and i can recommend it to anyone. Coder works pretty hard to ensure his stub is working.

Please note, it doesn't work for .net stuff (i know a lot of .NET guys will be asking, i prolly say it once and for all)

Just play around with the encryption method to get good results. it is not ur average crypter, it is an AMAZING crypter.

This crypter is not for kids but for smartguys, if you don't know how to use it don't complain or cry just ask support, owner and his support team are verry dedicated to there work. Don't sale trash tis topic. Everyday crypter is updating, even if old stub from before is still fud and usefull, next day new stub release. So I don't know what you all talkin.

You kids never learn, its all about knowledge, if you don't have that, than leave the game that's not meant to be for you ?

USG means 'unique stub generator'. You've probably seen some crypter showing a % how the stub is different at each crypt.

But be careful, the most part of people talking about USG do not know what they're doing.

Keep in mind if I add 1000000000000000000 times 'a' at the end of file, then I do the same thing with a copy of the first file with 'b', The both files are 99.999999999999999999% different, but in the reality....

1/ You could work a little bit on your UI. Customers need to buy something beautiful.

2/ You don't know what is an USG. Be honest with your customers.

3/ Stop using AVs on your main computer, you may distribute your own files.. Remember that some people paid to use your service.

If this is first time you use a crypter

im sorry its not for you sir

we run on limited users that must have basic skills

thanks

This is best FUD crypter I have used so far

always FUD!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
new stub evryday while old stub is still active
user friendly interface and easy to use
24/7 great assist and update from the admin guys.. I doubt if any other crypter coder can do that.
