Thread: [Forum and Thread Subscriptions](#)

Omniscient - July 13, 2018, 11:32 am

I have reset all thread and forum subscriptions. A plugin now prevents non-upgraded members from subscribing. You must have L33t, Ub3r, or r00t to use subscriptions. Changes have been made to the upgrade features page.

This was done in order to work on the email notification problems we were having with delayed notification emails. I'm still working on it but I hope that lowering our email delivery rate will increase delivery time.

Thank you.

B0Trun - July 13, 2018, 11:50 am

OMG but its ok , will do the subscription again .

(Jul 13, 2018 11:55 AM)Clapyou Wrote: [\[CITE\]](#) Mate your a fucking dickhead. Seriously you and your staff need to sort it the fuck out and stop banning everyone. Your a fucking disgrace. All that money spent on your stupid ass forum and you simply ban top members for stupid comments. You seriously need to brighten the fuck up... go suck a light bulb you pompous fuck..

That was actually Xerotic, who I notified of your constant flaming and harassing. Just gave him the heads up about this account as well.

well i mean omni just seen it so i think the case is closed

Dean Winchester? - July 13, 2018, 12:25 pm

haha do you remember that one time

Makaveli The Don - July 13, 2018, 1:16 pm

Great update Omni. Good stuff as always!

Omniscient - July 13, 2018, 1:22 pm

Well, this had to get done. We already have thread subscriptions based on upgrade but the forum subscriptions were blocked in 1.6x. When we moved to 1.8x I hadn't done the same changes. And this week I reviewed the database and saw hundreds of bot accounts with forum subscriptions.

Now all fixed permanently with a proper plugin.

Small things like this makes HF run smoother and better everyday. I remember when you banned some guy for 6 months in the past for having like 2k thread subscriptions. Thanks for keeping us updated. ?

Almonds - July 13, 2018, 1:29 pm

Keep up the good work.

You and the Staff deserve many back pats indeed

Saltpeter - July 13, 2018, 1:29 pm

Sounds good. I would have never thought that bot accounts with thread subscriptions would become an issue.

Good work.

Mr Kewl - July 13, 2018, 10:43 pm

What's the % of people using thread subscription?

I've barely used it all these years, is it even a popular add-on?

Xerotic - July 13, 2018, 10:46 pm

It is pretty useful now if you use the alerts system. You can subscribe with "No Notification" but you will still receive MyAlerts for it.

I've used it a few times in the past, it can be useful for marketplace threads, for example if you're looking to buy something from the members auction section and you want to keep up to date on the current bid. ?

Oh wow, I didn't realize it worked with the alerts system, I guess I should pay more attention haha

That's pretty cool

Bear - July 13, 2018, 11:26 pm

Changed my email on site, but I am still receiving delayed notification emails to my old email.

I'm sure it's going to take some time to cycle through all the old Subscription we had before the reset Omni did today.

The my alerts system works well for me

tbh always been useful because you could keep track of which threads had new posts in them in usercp
