BUY GOLD HERE: <https://selly.gg/p/db420546>

FAQ

[?] What is the difference between Gold and Bronze? Spoiler [\(Click to View\)](#) Gold includes full GPU support! You can mine cryptonight currencies using CPU, NVIDIA and AMD gpus!

[?] What coins can I mine with AdderallMiner?

Spoiler [\(Click to View\)](#)

Supported algorithms are CryptoNight, CryptoNight Lite and CryptoNight Heavy.

That means you can mine:

- Monero (XMR)
- Masari (MSR)
- Stellite (XTL)
- Aeon (AEON)
- GRAFT (GRFT)
- Intense Coin (ITNS)
- Loki (LOKI)
- Haven Protocol (XHV)
- Dynastycoin (DCY)
- Electroneum (ETN)
- Sumokoin (SUMO)
- Karbo (KRB)
- Bytecoin (BCN)
- RyoCurrency (RYO)
- Saronite (XRN)
- Bixbite (BXB)
- Solacecoin (SOLACE)
- Italocoin (ITA)
- Ombre (OMB)
- Niobio Cash (NBR)

WORKING WITH

[?] Windows XP

[?] Windows 7

[?] Windows 8/8.1

[?] Windows 10

[?] Windows Server 2008

[?] Windows Server 2012

[?] 64bit systems

(Jul 19, 2018 02:17 PM)sssniperwolf Wrote: [\[CITE\]](#) Update, I was given a vouch copy of the \$59 gold package cpu+gpu. At first seeing as this is C# malware I was not expecting anything out of this world, I went ahead and tested the cpu miner on a virtual box. I gave it a few cores and here is the result: Spoiler ([Click to View](#)) not too bad for a few cores on a virtual box, I then went ahead and executed both cpu and gpu on a different machine with nvidia gtx 1060 here is the result: Spoiler ([Click to View](#))

Very good results, I like the simplicity of the miner the cpu+gpu build is quite large around 3.8MB but what do you expect when you can run both cpu and gpu at the same time. I'd like to see more features although that would increase the size of the stub so all in all this is a great miner for the

price you really cannot go wrong with this miner.

You shouldn't be so aggressive.

I don't trust the seller, too, because there were a lot of scammer.

But now I got a vouch copy for one day. I will test the miner for 1-2 days and then I will post my feedback.

The CPU and GPU miner is more then 3MB big, thats not very good but ok. I already contacted the seller if this is normal or not.

thx mate

My friend tested it and found :

1- when he determine 30% of mining he got 50% I think this 20% is the donation percentage and sometimes the stub of idle mining and that one of non idle mining both work together!!

2-no it's not task manager protected and no injection , for that you will get big drop in hash rate it can be easily discovered by the client

zelvak - July 29, 2018, 6:17 am

(Jul 29, 2018 06:05 AM)love you 2 Wrote: [\[CITE\]](#) My friend tested it and found :

thx bro,

the are bad news.

Do you know a better silent miner? I really need AV bypass (eset) and maybe some Processes protection - best is hidden or windows process similar.

Best regards

Selfpwned - July 29, 2018, 6:59 am

Sorry for my late feedback. Was away for some days.

I got a vouch copy of this miner and tested all now

The builder is very good and simple. Enough settings to customize your own miner.

I scanned the stub and it was FUD, scantime FUD. Didn't tested runtime.

So good so far.

I ran the miner on over 300 gaming pcs (<http://prntscr.com/kcehov>) and this is what I have today:
<http://prntscr.com/kcehwr>

Maybe the miner is ok, but no one need a miner, which is FUD for 1-2 days. The miner will get detected after time and all bots will dc.

So a update function is important, so push out every few days a new FUD miner.

And maybe the GPU miner is working, but then every bot from me have just 20 H/s per GPU. Which GPU is so bad? And as I said, they are gaming vics, so its a bad hashrate. Maybe it is a problem that some GPUs cant be detected? I use some other programs and sometime they can just get the Intel graphic stuff instead of the real GPU.

Your feedback is perfect, thx you very much.I will try other one miner.FUD for 1-2 days is really bad for me:(

Selfpwned - July 29, 2018, 7:54 am

But most of the miner are not FUD for more then few days.

Thats normal and no one can do anything against this. Thats why we need a update feature.

zelvak - July 29, 2018, 8:10 am

maybe because a lot of "silent miners" are based on clasic miners (xmrig, xmr-stak)?

if anyone full codes new miner, i will be maybe FUD byself.

or no?

Intel graphic stuff instead of the real GPU.

that is meaning the GPU stub was not working or can not detect the the graphic cards

20h/PC = CPU mining

borito80 - July 29, 2018, 6:36 pm

(Jul 29, 2018 06:05 AM)love you 2 Wrote: [\[CITE\]](#) My friend tested it and found :

1- when he determine 30% of mining he got 50% I think this 20% is the donation percentage and sometimes the stub of idle mining and that one of non idle mining both work together!!

2-no it's not task manager protected and no injection , for that you will get big drop in hash rate it can be easily discovered by the client

Thanks for your bro comments, they are honest and very helpful.

I'm glad that there are users like you in HF.

Thank you "love you 2"

DeluxeSoftware - July 30, 2018, 3:52 am

Seriously? This is getting out of hand.

You guys are literally trashing this thread since it was opened.

The GOLD version includes CPU + GPU! Don't ever spam this thread again saying it was scam without any proof, I'm going to neg rep and report every bullshit here.

20h/PC?! You are obviously doing something wrong. Already many many customers vouched and tested CPU + GPU and are totally happy. I am using AdderallMiner Gold too and it just works flawlessly. @Selfpwned I'm kind of suprised how unthankful and bold you are. I gave you a free

vouch copy and all I see is you talking crap. If you mine and get 20h per PC, then either your mining machines are bad or you fucked something up. Test the miner on ONE machine with a CPU and GPU and check the results. I get up to 800h/s on one machine. And no, don't discuss this on MY thread. If you want to say anything, PM me.

@love you 2

Stop trashing, you never owned AdderallMiner but still posting here almost every day asking for features or accusing us of scamming. NO. Same applies to you, don't post here anymore.

Miner is up, fud, working flawlessly.

JustNothing - July 30, 2018, 4:03 am

Hi,
its possible to give me an vouch copy?Only cpu version.I wanna try it before will buy.
thx

love you 2 - July 30, 2018, 9:57 am

DeluxeSoftware you should not get upset from the honest review instead update your miner and i'm really interested to buy it

this is a proof that the CPU miner is not mutex and work both idle and non idle at the same time at 100% and never go back to 50% when the user is active this may burn the client resource and please be informed that the miner was configuring at 30% not even 50%

Miner is up, fud, working flawlessly.

They are all gaming bots and it would be crazy when I got just shit bots in the gaming niche. But maybe I got just shit bots, my feedback were not only about this problem with GPU. Its my honest review.

ReduxJS - July 30, 2018, 8:25 pm

(Jul 30, 2018 01:16 PM)Selfpwned Wrote: [\[CITE\]](#) They are all gaming bots and it would be crazy when I got just shit bots in the gaming niche.

But maybe I got just shit bots, my feedback were not only about this problem with GPU. Its my honest review.

Before trashing the thread, try to take every factor in account. Like you said you bought bots. There are a lot of variables in a mining net. Such as runtime, detection rate, the idle %, the quality of the bots, etc etc. What I would do to test the miner is buy some gaming RDPs and test it on there. So you know it's not a shit bot and can really see the amount of H/s it actually pushes out. Anyways. Just giving my input. The miner looks great and I read above about an update feature and I think that would be amazing. So yeah if you wanted to look into that Adderall that would be dope. Anyways good luck with sales!

All user use the same stub, so the miner won't stay FUD for more then 3 days. This would be impossible to manage, when you have so much users of this miner.

You need to use a private crypt, when its possible.

rad12345 - August 5, 2018, 8:23 pm

the miner dont run ... i get error.

if the miner is not support 32Bit, i need request a refund.

94% of my bots is 32 Bit so...., i will not able to use it. waiting for you replay.

Support. ? ? ? ?

Solved it. ?

Sorry no vouch copies. We have already given out vouch copies when it was first released.

The is the best silent miner on HF

Selfpwned - August 20, 2018, 1:45 pm

(Aug 8, 2018 08:46 AM)Selfpwned Wrote: [\[CITE\]](#) It is not. There is no update feature.

And just a notice for other user: Don't post a negative feedback, DeluxeSoftware will give you a negative rating then. :D

And I thought this one is a serious program.

It is a good miner, but not useful without update function. And I tested it with gaming Vics and got low Hashrate.

(Aug 8, 2018 09:05 AM)Ren And Stimpy Wrote: [\[CITE\]](#) Its updated... just update your client(s)

No one talked about if the miner is up2date or not.

If you do not understand or too dumb, then stop post.

You need a loader to use this miner. Otherwise its not possible to update the miner and all clients will disconnect, because it will get detected.

Please assist me.

Is it true that a miner is bad, when I can't update it, without any loader? Or is it good, that I will lost the most of the miner after few days?

Ren And Stimpy - August 23, 2018, 1:02 pm

Nope, not assisting you. You continue to troll and sales trash. Ask the other support.

nowirenlite01 - August 26, 2018, 10:29 pm

i sent you private message and you find it difficult to reply, i bought 3 months license and since i bought it i have not been able to use it.

Please reply

Miner is up & works flawless!

Nyx - September 17, 2018, 4:39 am

Is this native or not?

I cannot see what this is written in.

Also, is there any future possible update where you make 32 bit operating systems compatible?

Ren And Stimpy - September 20, 2018, 5:59 am

It is .net

As of now it is not working for 32 bit, but the coder is working on allowing that!

Zodiac - September 26, 2018, 5:40 am

What does this "one week" mean, anyway?

Ren And Stimpy - September 26, 2018, 5:42 am

(Sep 26, 2018 05:40 AM)Zodiac Wrote: [\[CITE\]](#) What does this "one week" mean, anyway?

One week with the BUILDER, the stub will last forever (might not be FUD the whole time, that is why the builder is needed to make FUD stubs)

I am online and able to assist anyone with support.

Mining XMR, there was a fork

hdhd - November 3, 2018, 11:48 pm

Is this still up to date and working?

RickAstley - November 4, 2018, 6:27 am

Is this working with the latest XMR fork?

DeluxeSoftware - November 17, 2018, 3:09 am

Hey guys!

Yes, the miner was updated and works flawlessly with the latest XMR fork. Enjoy!
Also was the overall performance tweaked. Enjoy even more hashrates!

Ren And Stimpy - November 17, 2018, 3:38 am

Thank you for the update.

Amazing miner!!!

GOoDMOoD - November 17, 2018, 9:30 pm

Hi, bought your Aderal miner Bronze , through selly, but mail didn't come to inbox or spam, could you PM me with instructions to receive week subscription

Still supporting this miner ?

Ren And Stimpy - November 23, 2018, 4:15 am

(Nov 22, 2018 09:19 PM)G0dzSoldiers Wrote: [\[CITE\]](#) Still supporting this miner ?

Yes, do you need assistance?

TrustMelmEngineer - November 23, 2018, 7:09 am

Any chance you will add a feature that when the miner sees taskmgr.exe or process explorer will stop itself from mining?

cheesybean33 - November 24, 2018, 7:47 pm

can you please pm me your skype (don't have 25 posts cannot pm) I have purchased your miner and need a little help with some problems I am experiencing.

First time setting up mining so I'm sure it is simple user error.

Thanks

love you 2 - November 28, 2018, 5:54 pm

where is the support, people?

I talk to Ren And Stimpy and asked for a test miner with a dummy wallet address to make sure the miner working well

he told me " talk with the developer"

I sent PM for both developers and no one respond till now

you have no support at all

love you 2 - December 1, 2018, 5:45 pm

the miner is out of stock

marck16 - January 18, 2019, 7:51 am
