Metra, mysterious objects scattered on the planet, represent the last legacy of an ancient civilization extinct for centuries. By harnessing the power of one of them, a new race has managed to rise among the others, yet the energy available to them is going to finish. To face the impending danger, a special type of automaton is entrusted with the task of exploring the outside world, looking for a new Metra as an energy source.

Yes, 4 months for pre-production (Concept, storyboard, animatic, pre vis...) and 4 months for production (Modelling, texture, Lighting, VFX, Compositing...) :P
