Works well overall. Nice simple and easy. Went through 200k passwords with no issues. With a known combo in there around the 100k mark and it picked it right up. If your looking for a Facebook hacker look no further. Plus it's cheap so there's that.

Helping this user over Skype to get this issue he was having resolved. It looks like it was on his end as this program does bring a false positive and he didn't know how to add as an exception. I hope you can post your thoughts on the program itself shortly. Cheers!
