Thread: [What is the best wordlist for bruteforce attacks?](#)

Forgive me as I don't know if this is the right section. I'm trying to learn how to bruteforce instagram accounts but I don't know where to find a good wordlist for the job. I don't have any malicious intents at all, just some people scamming followers. Thank you!

That is still malicious intent... Regardless of your intentions and what the person you are trying to hack is doing, it is still illegal and considering you are here asking for a wordless to bruteforce (one of the most ineffective methods for beginners) you will be caught.

Either your story is bullshit or you are not thinking right. I commented on the last time you asked for help on this and told you the same thing.

It will be almost impossible to bruteforce the actual instagram account, think outside the box. I am not saying anything more than that however.
