Thread: [CAMPAIGN! Open Source SMM Panel - Drip Feed - Auto Order - Comment Payment API - NEW](#)

ersinyahya - July 18, 2018, 7:37 am

Hello Friends, I am presenting the SMM Panel you want to write a long time message. Our panel is coded in the direction of your requests and suggestions. Any maintenance etc. Innovation will be offered free of charge as an update. You will be asked to read one of the details of your recruitment and write down one of my contact addresses on the bottom to be sure. Then let's go to position

GIANT UPGRADE: We've added a new one to our open source packages! The old paketimiz will continue selling at a price of 50\$ with the features of the new pakette, but the new paketimiz will be sold for 70\$ with new features added. Two pakets will be on sale as OPEN SOURCE. GOLD PACKAGE COMPLETED!

New Pakete (GOLD PACKAGE): Drip Feed, Auto Order (This order will be continued until the end of your order on the last delivery of the given order, the end date can be selected.), Comment Order (You can now send the comments you want to send to your posts), Service Add-on (Newer Theme Designs (a more sophisticated home page and site background), Logo and favicon plugin, smtp mail settings can be accessed from the management, online payments will be listed, you can add analytstic code and live support code from the management, you can change from footer management, you will not have to write me again with remember me, you will be able to give bonus to payments, keyi h regardless of the system, the order is placed in your waiting list, the order that does not go to your management panel is dropped and then you are notified of the error and then you correct the order to the order of your panel which is sent back to the order process and your customer's transaction will be completed and your customer's transaction will be canceled.), Private Pricing for Members (You can price all services differently to your desired member.)

Script Features

- Adjustable design from the Management Panel with 17 TEMA options convert your design to your desired demo Some examples have been added to the picture because the change in membership is limited.
- It is PHP and AJAX code, it keeps its update with PDO structure.
- There is a dealership system, if you choose the member as a dealer you will be discounted from the panel you set.
- You can give your own APIs to sites that offer different SMM services, and you can make it possible for members using your API to shop from your site 24/7.
- You can use the API of the social media provider you want, and you do not have to stay connected to a site. For example, you can use the API of any or more companies that provide social media services in the forum.
- Instagram follower through your site, you can sell on Facebook, Youtube in the same way of watching, enjoyment, provide API in these services.
- Price List: The category, sub-category and service you add will be determined and listed, you can see prices in non-members.

- You can order any order according to the order intervals specified on the order making screen. Your vanity falls by the order quantity. For example: If the 1K price on the list is 0.30\$, your order for 100 pieces will be reduced to 0.03\$ TL.
- You can request a password renewal link with my password. You can click on the link to find your new password.
- Unsent transactions are returned. (Problem-free return system)
- Paywant, PayTR, Buypayer for online payment is added to the system.
- There is an SMS System, you can send sms to all members in bulk or you can only send sms private.
- There is a Messenger-like support system that can notify your members of your problems with support request, flood is disabled, new request can not be opened when request is open, request to open feature is available.
- Information you want on the New Order page. at the same time you can also inform the FAQ page.
- Your members' API Keys are located on My Account page and you can change your API Keys at any time.
- Ability to display orders, receive account information from the screen when you select the Balance Upload page, make payment notifications at the same time and make online payments.
- Get information from the administration panel, manage all site settings, API settings, sms settings, service settings and more.
- Please check the demo for more.
