Thread: [Would you like to see debates about current topics on HF?](#)

VouchPotato™ - July 19, 2018, 4:02 am

I see super many good arguments on HF by smart people, and I would like to propose creating a debate group via twitch/youtube, live and then recorded for future streaming. Would you be interested? What would you like to see discussed?

I don't care what a group of 15 year olds think about topics.

That'd be pretty funny to watch.

What do you even want to discuss about? The SRPP board is already an "Everything & Anything" area for most debate topics.

Same topics but in a different format, that's all. If the topics and information are interesting I'm sure this could be popular even outside HF. The demographics of the forum are an interesting one, 15-year-old boys today will be 20-year-old men in 5 years, healthy debate about topics that affect everyone are only a good thing.
