what crypter does it work with and can i have a vouch copy ?

cr10111 - July 21, 2018, 8:10 pm

Can I ask what is meant by webcam logger? Does it simply log times the webcam was used or does it record the webcam even when it's off? If it records, how is the quality? What codec is used etc?

All the known crypters should be working with Ond. And no, you cannot, sorry.

It activates the webcam logger, and takes a snapshot and delivers it to your log. ?

Appreciate your patience. Will post an update here when I have the .dll fixed (need it from a friend who doesn't have the same timezone as I do).

Sales can hold until I have it.

Will post here when it's fixed. =)
