What's scary about that number is it's probably not even the real number, it is likely higher and we'll only be able to see it a month from now due to Steam API limits.

netpulse - July 19, 2018, 1:21 pm

Biggest vac wave yet it has still failed to hit me.

Kinda sad considering i've been using 5 popular cheats on the same accs and on MM games.

I knew I recognized that ID from somewhere.. FeelsBadMan

PolarisGang - July 19, 2018, 2:20 pm

Hopefully this means people will go back to real coders again instead of using these pastas.

Frankey - July 19, 2018, 2:31 pm

Are those only CSGO bans? Or also other games? (Tf2 etc?)

Because that number is hugeee.

It's any game that uses VAC or issues out game bans, but I think it's safe to say they are predominantly bans from CS:GO.

What's special about this list? High value accounts?

Yep, as well as moderators of certain cheat providers, expensive private cheat users, high valued inventories, etc. A bunch of memers.

Muscleboy - July 21, 2018, 4:34 pm

Yikes lol. Don't know why people dont just play legit

pirex - July 22, 2018, 12:07 am

This is a delayed ban from when all internals were detected, i finally got hit after 3 years using a private internal.

All pasted internals*. Skeet is still fine while being a 1500 user internal hack.

all 1500 users aren't active, its just registered on forums.

I think the more exact number of "active" users is 700 or so.

God damn, Isn't skeet like \$20 a month?

That's \$14,000 for the Skeet team / month

I wonder how much huge sites like X22, AA, AJ, AW etc pulls in every month

AW probably around 50-100k euro a month. The guy got a Ferrari, and live in a country with lowest taxes, such a lucky man :D

I get rekt by taxes, first 25% vat, then 42% income tax = rekt

Taxes might be a bummer in some countries but being tax efficient is where it counts ;)

makemefake - July 24, 2018, 9:43 am

Thats a whole lot of game bans as well holy moly

Manks - July 24, 2018, 9:44 am

Look at all that free money lmao

not pasted but yeah sure ok

Thelegend28 - July 24, 2018, 10:38 pm

Still no Vac on Mac but they did make cheating on it harder a few weeks ago. There will always be work arounds though.

How did it get detected in that case? Cause its pasted. I dont even know what cheat you are talking of but it must have been amusing to have a private get detected.

Why cheat with such an expensive inventory ?
€1300 in pubg lol

VloneThugX - July 26, 2018, 12:58 am

i also got hit on 2 accounts, but i used the cheat like 2 months ago lol

I'm hoping he cheated on another account with a phone number linked and didn't realize it can ban across accounts, but who knows.. He has the Playerunknown set on PUBG which is around like \$1k or something I'm pretty sure.

LincolnOG - August 19, 2018, 2:38 pm

For that time yes,its the biggest. But its nothing. About 15 million players in the world,so think about it. Just imagine how much cheats and cheat-engines will be buyed and created in future and dont forget about price of any cheat. Exept from level of detection of them.
