You should consider allowing people to upload their files on the website (temporary and automatic removal once order is complete).

it gets the site flagged instantly..anyway the current option serves the best you just need to message the download link of the file after the purchase and the bots are added fastly.

thank you for posting :)

So the shop is not automatic?

It is. I said posting a link to the website as messaging the link. You just need not upload the file, but provide a download link instead and the bots are added instantly after the purchase.

Spoiler [\(Click to View\)](#)

#1) In the "download link" input, enter the direct download link.

#2) enter number of bots. (example : 400)

#3) Pay with any of the available payment options.

#4) Loads are added instantly.

Kindly check the OP for a list of file hosting websites that are compatible with our BSP.

Please do not hesitate to post here about any queries you have about the shop and service. You can also PM me and I will reply you as soon as possible.

botbuyer042 - July 25, 2018, 6:31 am

I purchased and just had to put Download Link into input asking for download link and began to receive instantly after this.

Vouch for this seller.

this is a list of file hosting sites. You can use any hosting from the link above. The direct download link from those websites above works perfectly with our BSP.

Lol, don't buy this. Looks like I've been ripped off for \$15.???

At first I tried to purchase with ETH but after a while I realized that the ETH amount to send was completely wrong (around \$1 and my order was at \$15).

So then I made a new order with Bitcoin and paid the 'invoice'. I never received any stats link and still haven't received any loads and it's been 2 hours.

I've sent OP 2 messages which he have read but not responded to (while browsing Hackforums).

Pirate - July 25, 2018, 9:56 am

I have sent you a message Juffar kindly check it.

ETH wallet in our system has some faults right now it is being fixed.

I will sort why Juffar has not got the loads and then post in a few minutes.

Pr0x0 - July 25, 2018, 12:38 pm

Warzaa-S.A - July 25, 2018, 1:48 pm

Pr0x0 - July 25, 2018, 3:06 pm

Wondering if anyone actually received any bots after purchase?

I haven't received any loads at all. Got a message saying my file was the problem but the funny thing is that it's the same file I've used today on other botshops as well and there haven't been any problems there.

He's not even the owner of the botshop, he's got no clue how it works either, he's just the sales thread holder on Hackforums.

Look through his threads and you'll see what kind of kid he is. At least you have a contract so you can open a deal dispute here. I don't.

(Aug 1, 2018 05:38 PM)Jukeboxhook Wrote: [\[CITE\]](#) DWC with op, he has a few deal disputes open Hi..I have replied in the scam report. This is an invalid report. The only possible scenarios is that he uninstalled the bots after he received them and sent to a different or a problem from the buyer side could be like the BIN not working (for which we don't compensate), receiving the bots yet no info, a BIN which is detectable, a competitor who tries to ruin the shop etc..so please try the bots from my shop and write a review..it's nice of you to issue warnings to the new buyers but think what if I'm just giving away the bots. It means you are simply sales trashing. If you try some bots and leave a review, that will get our a shop a cool vouch and help in running the shop better aswell.

buy some bots from the shop now ! B-)

I took care of that because he ripped me and some other users off (there is at least one scam report open).
