Thread: [Need a good crypter for a miner XMR miner](#)

ernestmiller - July 20, 2018, 2:49 pm

I need a good crypter for my stub my XMR.net miner that I am using on some RDP's

Any suggestions?

int - July 20, 2018, 6:02 pm

Dont buy crypters from hf
./thread

no dumbass all the crypters on hack forums are widely used and skids use virus total to scan which makes the crypter trash the best crypter you will get on hack forums will be 7/21 definately not fud if you want a good crypter you can rent a private one for 1000+ a month or you can buy titan crypt which is pretty good but its expensive, so advice from me to you learn c++ and you will save alot of money

Jacque Fresco - July 21, 2018, 2:00 am

You have no proofs, what makes me belive you are just advertising for titan crypt. If those Crypter are not FUD why are they then vouched/buyed all over hf? I'll never bought one here, i can write them myself. And i never hearded people saying before these crypter from hf are bullshit ^^

- not all crypters are widely used
- not every customer is a skid
- have you tested every crypter on hf for its Detetection Status?
- more than 70% of the members of this forum, does know about the sharing policy from VirusTotal
- Be Kind.

Toxicque - July 21, 2018, 2:23 am

Titancrypt is like the only good crypter.

Thats basically because the self decryptor is from luminous, and that he bypasses all hooks using syscalls.

mustafa573as - July 21, 2018, 3:41 am

look titan is the best because not everyone can afford a 500\$ really good crypter / 99.9% of crypters on hf are trash alot of the people here on hf are skids by that i mean they use vt and dont know how to spread which means the victim gets specious and they use vt (when someone uses vt the crypter is ruined they have to change code) / im not advertising titan crypter i have a private one / all of the are widely used and they people use se methods which ruins the crypter/ i have friends that have hf crypters and all of them say they are trash/ in additon even those this forum is named hack forums half of the people here dont use it for hacking (what i mean but they stuff from here is not the best)

and finally i dont give a fuck go waste your money on a hf crypter im tryna advise you if you dont want to listen go ahead

thanks

He is right though. A majority of the crypters in here are bs, fake runtime and scantime results.

ernestmiller - July 21, 2018, 5:19 am

<https://greencrypt.io/>

I was recommended this one is it any good??

its for xmrminer.net so I can mine on multiple RDP's that I have access to

Ren And Stimpy - July 21, 2018, 5:20 am

Check out Aderall GOLD MINER

ITs FUD

Jacque Fresco - July 21, 2018, 7:05 am

i still cant believe that those crypters are waste of money. Im interested in seeing more information about that. I already saw alot of users asking for good crypters, maybe this is a symptom for bad crypters.

Have a great day

a majority of crypters on here just use buzzwords to seem like they are good. They also fake scantime and runtime results.

NYANxCAT - July 21, 2018, 7:47 am

Hello, I think you posted your question in the wrong section.

You should post here next time [Cryptography, Encryption, and Decryption](#)

Crypters on HF is not that good, You never get 100%FUD and you need to update your payload like EVERY 12 HOURS, Because the users are spreading it + scanning on VT

Akara Products - July 21, 2018, 8:48 am

You are such a dumbass. There are indeed always up to date crypters out here on hackforums. And the crypters i use are most from hf and i dont experienced any problems with them. You better inform yourself before posting useless shit posts like that one above.

@OP i can recommend you Data Protector.

Toxicique - July 21, 2018, 9:08 am

Hf crypters throw around retarded words like: Unkillable persistance, BSOD on termination, anti memory scanner, and shit like that, while written on top of .NET.

I'd be surprised if any crypter on HF is below 5/13 rt.

However, some Native crypters like titancrypt are actually nice, but the best part is they dont throw around bs words which could be considered false advertising. Instead they make their features clear: dynamic api calls, raw syscalls, anti-emulation, is what you would find. Not some C# skidded paste, with a photoshopped design.

mustafa573as - July 21, 2018, 9:25 am

look you think hf is the best hacking forum in the world because you paid money, let me tell you this it is not and as the guy above me said hf crypters are fucking trash (cyberseal and data protector lol 5/13) so before saying dumb ass shit think is the 20\$ crypter really worth the 5/13 detection i think not i can copy and paste code online and ill get better than that lol

thanks for your time and everyone knows data protector is trash (how much does the owner of data protector pay you for sales?)

Akara Products - July 21, 2018, 12:01 pm

So you are selling you are copy and pasting others code to feel better? You are obviously triggered by simple facts i just told you. Also i never mentioned Hackforums is "the best forum", so i dont know how you come to that one.

Since you cant afford hq crypters like Data Protector, you are not allowed to judge about its quality anyways.

mustafa573as - July 21, 2018, 12:25 pm

Lol I a private crypter that's 1200 a month I think I can afford 20\$ plus I've used titan that's another 500 1700>20 quick maths

divino2017 - July 21, 2018, 5:10 pm

i think you should buy on darkweb for private crypter to get unique builds..

ye i got .net crypter also need confuserex to get rid of common assembly detection. this a method
for .net applications.
calm ur tits bosskur.

ob shit

YourRage - July 21, 2018, 6:17 pm

need a good crypter as well, any few good ones?

I do not find Titan crypter, could you put a link?

Thank you

mustafa573as - July 22, 2018, 10:16 pm

(Jul 22, 2018 07:04 PM)borito80 Wrote: [\[CITE\]](#) I do not find Titan crypter, could you put a link?

Thank you

It's 500 bucks you don't need that link you broke

divino2017 - July 23, 2018, 12:06 am

why is Titan crypter so expensive?

Jack? - July 23, 2018, 3:27 am

cyberseal or a crypter being sold on tor/other forum. best options

kasy - October 3, 2018, 9:20 am

Why not try the cyberseal crypter

3robimayne - October 3, 2018, 12:07 pm

I agree with that lol, people say cyberseal is a very good crypter.. if you buy it and ask the owner he
says to play with the settings and that you should get a fud file.

Harvey Specter Quinn - October 4, 2018, 10:42 pm

I might be able to suggest you one, But its not from Hf. Shoot me a pm.

exelab - October 5, 2018, 2:51 am

i make custom made one in delphi/asm using runpe memory execution

Fr33d0m333666 - October 9, 2018, 7:21 pm

What crypter you reccomend i cant pm can you pm me

seafko - October 11, 2018, 7:08 am

go to crypting section

Kotsya - *October 11, 2018, 5:46 pm*

Im about to start selling a crypter here that will support that, pm me.

Voltaire - *October 15, 2018, 6:26 pm*

Idk if it's still for sale, but a while back I used spartan crypter and had only 1 detection out of the many virus checkmate offers.

Btw, only use viruscheckmate. Any other scanner including nodistribute will share the sample you submitted, and it will not be FUD for a long time.
