Thread: [Shell Injection alerts!!](#)

BT_751 - July 20, 2018, 4:14 pm

Hi,

Guys I scan the web site using vega and i get a high alert :
"Shell Injection"

The alert divided into many parts

But the most 4 who attracted me it's all of the same name: /

I find in the case of "Request"of number:

1-POST / [_user=vega _pass=vega`true`]

2-POST / [_user=vega _pass=vega"true`"]

3-POST / [_user=vega`true` _pass=vega]

4-POST / [_user=vega"true`" _pass=vega]

Please help me to know how can i benefit from it?

And thank you
