Thread: [Skiddy Skid Skid..](#)

Hydrolancer - July 21, 2018, 7:12 pm

So one day on a different forum, its funny, i met a 15 yr old asking for his .vbs downloader script to be SPREADED...

Then, i said yes and i used my Program called Hydropump i coded, to wrap it into a exe and bypass Norton...and bind it

With a method that doesn't drop on disk

If you want hydropump , chedk my thread history..

He says he got no installs for his # 1.7.. i said he used no zoneID, he asked 'wtf is ZonEiD???'
I said google it.. he said he got his vbscript from googling it....

I called him a skid and i said I know C and im learning C#, he said hes learning C# with unity in highschool for 6 months and all they taught him was core of it, not anything like webclient or DllExport/Import/IL, i told him .net could be decompiled

He told all his friends and the teacher says it isnt true, but he downloads dnspy... He told me Im ANONYMOUS, i told him ill dox him if he doesnt get out of discord, as i dont need mosaic down syndrome from ppl like him

Soo funyyyy..

Tldr tldr

Hes a skid that didnt knoe that dnspy exists and thought i didnt spread his wrapped vbs downloader

Later, he says he didnt know he had to change zoneID for his # 1.7 to get installs ...

HydroMax is a great alternative name for whatever program you have developed. :))
