Thread: [Pokeland Legends cheat/hack request](#)

**zotoh** - July 22, 2018, 12:17 pm

Hello, ive been playing pokeland legends for a year now, and i9ve spent some money on it, nothing drastic. but im getting tired of ppl low level having absurd advantage either from spending 500+ dollars on a game, (nothing unusual, i understand concept of pay to win) or hackers. what bothers me most is that low lvl person has massive amounts of rare and legendary pokemon that are purchasable ONLY in shop after u spend 50\$ + and on most of those accounts registered amount money spent is 0\$.

So i came here looking for help. Is there ANYONE who can actually make a hack or cheat that actually works (not that survey fake stuff)

Thank u all in advance. ?

Zotoh

At one point I managed to download their PHP configuration files and accessed their database, made myself an admin.

They let me be an admin for about a month until I accidentally changed the spawn rate of a rare Pokemon and they removed it.

I have the source files of the entire website, but I didn't bother copying the database or game server files. Not worth the risk.

I also figured out how to log into any users account, and spoof users in the chat - they fixed that.

I have the only "dark" pokemon in the game - a "dark krokorok" I generated while I was an admin.

Pretty fun game. You may have heard of me, my username was Vernaldo.

There's plenty of ways to hack the game:

- I created a chrome extension to automatically battle and catch shiny pokemon.
- Walk through walls (This allows you to generate unlimited money via minigames and go anywhere in the game)
- Run away from any wild pokemon or trainer battle
- Steal peoples pokemon just by sending them a specially crafted link via PM
- I have an account that has 0 pokemon on it, it breaks the tournaments when you join, used to get free shiny pokemon
- Flood players with battle requests so they are unable to play
- Bypass chat filters and post any curse word/emoji you want
- There's more I forgot right now, haven't played in months

I'll build an extension soon that you can purchase an install to automatically enable these hacks  
Stay tuned

I'll sell you the Dark Krokorok for the right price.

I'll also sell you a bunch of shiny/gold pokemon in bulk, I have a lot.

Let me know if you're interested.

Anu hacking for pokeland legenda aka nowadays monster dynasty?

**Ares25** - February 27, 2019, 2:41 pm

i need a pokeland legend hack pls

**Icypapicold** - May 20, 2019, 8:27 am

If anyone can make a hack for me to use I would appreciate it

**Mahl Koot** - September 22, 2019, 1:50 pm

Im looking for hacks of any kind for as it goes by pokeland legends. Monster dynasty etc.

I spend money on the game, might as well pay someone to hack them. It's a apk file so adding some stuff to the file shouldn't be too difficult.
