Thread: [NEW!! Free Gas Method](#)

packofmidgets - July 23, 2018, 1:13 pm

I have a new method to get free gas I will be selling.

I am only selling this to 6 people. copies left 5/6 ****EDIT**** Selling this last copy because someone will not be doing the method and decided for us to sell his copy to someone else.

Price for this method is \$500 I will accpet BTC/ETH ONLY

This method is NOT for shell stations.

This method will work in US states

With this method everything is done online and the only thing you need will be Proxies. (US)

All codes you make will last for ONE YEAR!.

I will not disclose the gas station these work at until you purchase but they are all over the country. I will however tell you if they are in your area if you simply pm me the zip code you wish for me to look up.

There is no purchase needed to do this method and no cracking accounts etc.. just run a program and get the codes. It is as easy as that.

Post here or pm if you have any questions (Serious buyers only)

****EDIT**** Oay so some are worried method will be patched before they can make there \$500 worth of codes back SO what I will do is offer to the last two buyers this: I will give you \$500 in codes if it gets patched before you can make teh \$500 worth of codes before it gets patched. I am sure you will be able to with my program just by running it for half a day but I will offer this seeing how I have already made 7-8k worth of codes. Also there is now captchas with the method so we are remaking the script to work with them to make codes and doing mor eupdates as well. Although I do not offer lifetime updates with this purchase I do freely give my help and new updates at my own disclosure so you guys can keep this going. When you purchase this you will get the method only but I will also send you the newest program at the time or the one coming up when it is finished to help get you making more codes. I have decided to sell 5 more copies so get them while you can. As always I reserve the right to sell more or to not sell to others. Use this method at your own risk I am not responsible for what you do with it.

TOS: no selling codes until all/majority agree to sell codes so everyone has fair shot at making good amount of codes for maximum profit. Also you are not allowed to resell this method or leak it.

Copywriter - July 23, 2018, 1:15 pm

Vouch for Midgets, #1 source for all gas related discounts.

BottomNotch - July 23, 2018, 1:23 pm

Sending you a PM, pretty sure I know which gas station, but I need to make sure it's one I'm thinking of.

Woes - July 23, 2018, 1:26 pm

Huge vouch for packofmidgets and this product. I've personally seen this method in action and can guarantee that it's a money-saver and money-maker! I'm still using the codes to this day, thanks again man.

packofmidgets - July 23, 2018, 2:02 pm

Thaks for the vouches guys. And Bottom Notch I have replied to your PM and yes there are plenty of stations around you.

Patriot - July 23, 2018, 2:09 pm

How many codes can you make per day? What are they worth?

Is this a method that can be patched in a few months or so? Seems like it as you are running a program.

Initial - July 23, 2018, 2:14 pm

Pmed you asking about availability around my area. Really interested waiting to see a review.

The limit will be A LOT but I will be asking that everyone limit themselves to a few hundred a day so it doesnt get patched. Yes it is just running a program and you will make codes that easy. Value has not been determined yet since I have not been selling the codes. I have only used them for myself and family. I will be selling the method to 5 ppl before I sell codes. This is for two reasons one is the main which is to make as many codes as I can before otehrs do it. the other is to give otehrs a chance to make codes as well before others mgiht figure it out or somehting. I of course would not be able to tell anyone how long it will last since this is a method and almost all methods get patched eventually. The more who do it the more likely it is to end. This station these codes work for are around every major city and throughout the states. If you wish to know if one is near you just pm me your zip code.

Michael_ - July 23, 2018, 3:07 pm

I'd be willing to purchase a \$3.00 code for \$25 if you're looking to re-sell them separately.

Killy - July 23, 2018, 3:13 pm

I'd definitely be interested in buying. I'll try and get the money. Maybe my roommate would want to split the cost. Would you mind PMing me a few more details? Is it 100% free gas? Is it only up to 20 gallons like the Shell method, etc.

this is all done wiht a program so it is made within seconds/minute. You can do them by hand whihc would take a couple of minutes per code

I should have one of them posting back shortly but as always ppl who buy methods like this like to keep it secret and is worried about just abyone getting it and then wanting to sell codes too fast. This is a touchy thing which is why I will be making it apart of the deal that anyone who buys this will all agree to vote on when to start selling codes to give all the best chance for profit.

Thank you. I only feel it is fair to everyone. I have not sold ANY codes and I am only making the codes myself until I sell these 5 copies and everyone votes on what to do. I will say this, if we wait to sell codes we look to make even more money. This is to make it so no one will be able to figure the method out and once the promo is over then we will be the only ones who will have the codes to sell. Since the codes last one year from time you make them its a perfect money maker. You can make short term money (could be long term but ppl figure things out so idk) but if you wait you can make 10X or more longer term. I really truly think this will make me more than shell codes ever did. and I made 10k a month with shell.

If the method gets patched a week after I purchase, will the codes I generate still be valid for a year?

packofmidgets - July 23, 2018, 9:32 pm

(Jul 23, 2018 09:22 PM)RAGNAR Wrote: [\[CITE\]](#) If the method gets patched a week after I purchase, will the codes I generate still be valid for a year?

Yes UNLESS you use the same proxy/ip for all teh codes you make which will make it so they can banned the codes. You should be able to make them now and if method gets patched a week later you will still have 1 year codes. I can not put a garaunttee on this but you understand how methods work and I am sure you can see why I say it should be good once i say that this is not some off the wall method. it is just taking advantage of a promo as most of my methods do but I will say again

that you do not make any purchases or fake purchases etc.. it is simply generating codes that will be instantly credited with the funds for the free gas/in store purchases.

Do ppl actually play at the poker tables?

Alright hey guys, I just want to make an update regarding my interacting with @packofmidgets

So he started selling his shell method and me who been buying his codes for ages along with my family, i decided to get the method and maybe save some money since i have to fill up every 2 days. So i go on and contact him and i buy the method, he tells me everything and I told him how it was complicated and he told me to wait and he will help me set up, after that day i didn't hear from him for a while but since i wasn't getting a response from him, i decided to ask why he is on hackforum and not replying to me, unfortunately during that time his aunt died, so trying to be respectful, i didn't say anything and let him deal with whats he going through hoping that when he is better, he will help me set up. You may ask, why didn't you just set it up, well his method require me to make account and i didn't know how to get that info along with the mastercard that supposed to be in the account, so since he didn't give me none of those info, i decided to just wait till he feels better because he did tell me he will help me set up, fast forward about 5 days and i come to hackforum and see him selling this method and he still hasn't reply to my multiple texts so i contacted him again saying i need help and all that which he said that the shall method stoped working, now i feel like i got ripped off because he isn't replying to me. I texted him 2 days ago and he hasn't responded yet he was online few hours ago here replying on this thread, he told me he would give me the new method although i have to pay more, which i don't find fair at all, because i never got the shell method to work, he told me he would give me a code to use with shell and whatnot if the method doesn't work which was a deal with made before i got the method, but that method is patched, so i am guessing he doesn't have a code, I want a refund or at least something to get my moneys worth.

I am not sale trashing, I paid for the shell method and it didn't get me shit so hoping you seeing this contact me and sort it out.

I already have a sold copy to Hallow he just has not gotten around to posting on the thread. You are welcome to PM him and ask him yourself about the method buys. as for the guy who boguht the shell method and it was patched two days later I gave him the method told him exactly how to do it. he wanted help setting up the social media method instead of him doing the one I used to make the

codes faster. I can not nor can anyone else tell you when these methods get patched so you buy them Hoping they will last but I will nto be giving refunds if the methods get patched. He had it for a few days before it did get patched he could have made him money back same day if he would have went to do the method at teh gas station and then used the other 1-2 days to make profit. Thats not my fault he waited for me to tell him how to do the other method which takes time. I also told EVERYONE that my aunt had just passed away and I had to deal with a funeral and family for almost a week I did respond to him any time I was on and he knows that. But this is not a thrad to be posting somehting like that and i also told him he would nto be getting a refund but I did offer to sell him the new method half price to cut my profit from it and only my partner would make any money. I feel I was very polite and had explained my situation with him. How I just had to pay for a funeral and was about broke myself from that.

I have the current method that the OP is selling atm, can't really give out a lot of information about it, but I confirm it to be working. Also curious to know how these codes work. Can pay in BTC and will show proof of funds if need be to get a thorough explanation of how this all works. I probably spend \$300/mo on gas

its similar to how shell codes work. You will use the program to get codes and then just use tham at the pump for free gas as in you will go to pump and type in the code and it will give you the free gas basically.

This is very tempting; the price is steep though. Especially if it could possibly be patched a week, or even a day after I purchase. Is there any other info you could provide me; maybe to confirm I will be able to make my 500\$ back. I don't personally drive. I'm looking at this more in the aspect of reselling the codes via online and via IRL (would this be an issue?). I see you're not wanting people to start selling codes until all copies are sold; and im willing to wait. Just want to make sure I WILL

make my money back.

Thank OP ? .

Again if one of you who buys this gets upset or something and leaks the mehtod or if someone else figures it out and has it patched there is nothing I can say or do so no I can not promise anything other than it works right now. I do suggest you guys not make too many codes at one time so it looks like nothing is going on to them because how shell got patched teh first time was someoen made thousands of codes in a day. but I mean just use your heads and be careful not to abuse it if you want to make your money. It would effect me as well which is why I tell you all this.

I totally understand; but once again you're the one selling the method . You know who you're selling it to . If you suspect someone's going to abuse the method instead of taking your advice . Don't sell and wait for another customer ; it's better than a quick 500\$ and having the method destroyed. Which I mean it's your method ; so so as you please bb girl ? . you can make enough on codes to fill up \$50 within an hour (could be closer to 20-30 minutes) as for the chance of getting caught I really dont know hwo to respond to that. I mean chance of getting caught doing what pumping gas or making codes? you use vpn/proxies to make codes so doubtful as for pumping gas they COULD tell you to leave but I mean I doubt that would happen. this is not cracking accounts or antying liek that so not sure what you mean by that. You make the accounts fresh which you use so not like your stealing info from someone.

\$50 within minutes is pretty good. I mean last shell method took 30 minutes to make a code worth \$40 so this one is better/fast as for making the codes. Not sure how you could complain about how long it takes to make the codes here since your fee is only the cost of teh method.

\$500 in codes. So you will get your money back either way. I am confident in this method that you will make/save money. If you just use for yourself you will be getting free gas for a year or atleast your \$500 back worth. (still feel you will have thousands of codes before that happens)

Buy every single copy, take a few weeks to (explore/study/\$\$\$) the exploit and then contact the corporation. You can hustle a shit load of cash if you are an independent researcher

Can I buy a copy and just monetize it by offering my consultant time to the corporation ?

What is the problem ? Just buy every copy he is selling and nobody will every know.

If you decide to resell the vulnerability for 500\$ you are just digging your own grave.

Sell it to the corporation itself when you feel like it . It is all a question of dealing. You could

probably charge them 500 000\$ after studying the value of the market. You can guarantee a number of money they will save.

Stop spreading information ffs

Send me a message and lets schedule a conference call. If you are interested I will invest 500\$ and give a percentage of profit made from the information to you 2.

will also depend on the station you use since the pumps are different and process payments at different speeds.
