Crackhat

Just a quick description of what and who we are.

A group organized by me, we have a chat elsewhere that i can invite you to if you're interested. Keep in mind that when joining the first time there is a small "task" to do before you get verified, this is to prevent leechers from joining and actually getting the people in who we want to be in.

We are a group of people with specialities on everything, exploiting, cracking, coding even whitehat. Anyone who passes the join task will be a member of our fast growing group. There isn't much to say about the group right now other than this, we currently are about 5 days old and reaching 60 members. If you are interested in joining leave a pm below or add me on Discord: Elmo#0001 and i'll invite you right away!

Within these past 4-5 days i'd say nothing else than create a config to bruteforce a site with cloudflare on it & also cracked a rs checker program that i had some issues with the dev.

I would actually really like to join this, not sure if my skill set fits. I'm still developing my skills everyday, mainly with coding and tech stuff. Would be cool if you could get back to me, cheers.
