I'm starting a supplement company it will be called east coast nutrition. We are looking for a good website designer for the graphics side of things. We have a programmer to handle the rest. We are thinking a green and black color scheme. Contact me with work. We will not pay you if we do not like your work. We must be satisfied to pay and we will pay very generously. Post below or contact me for details. Show previous work if possible

I can do it for you at a cheap price depending on how much gfx work i need to do.

I can surely provide you with that green and black color scheme. I only take Pay Pal and no upfront charges, i'll only charge when you're satisfied with the work. Reply if interested.
