Some Vouches From Services

Big vouch for this product, received a 1 day trial and it's amazing. So far I've used the Account Creator feature with no problems. The autocaptcha works perfectly, however you do have to provide your own API key although this shouldn't be a problem as 1k captchas only cost 90 cents. Will update when I've tested other features.

(Jul 24, 2018 01:41 PM)GrandpaSherman Wrote: [\[CITE\]](#) I got some extra time to use the program to test it out, and I have to say it's one of the best tools on the market.

At only \$40 lifetime as well it sounds too good to be true, but the dev said he'll continue supporting. Account creator works well with bios and avatars, viewbot works perfect. Provides private proxies that can easily get you a stable 60+ viewers

Follow bot works, chatbot works. I don't think the whisper module works.

Overall it was an honor to get to test, and if I can find an extra \$40 to spend I know where it'll go

Not limited.

You get 30 minutes whenever you login.

Amazing product, did the test and everyone else should too. Its free and no registation. Worked PERFECT so purchased lifetime copy. Updates coming out everyday.

CyberKore - July 30, 2018, 7:24 am

-Account creator: works very well, but i suggest to add a STOP button.

-Views Bot:works good but i am not sure is using socks or at least is using the same socks over and over, despite it says it loaded 260 and i selected 260 proxies to be used, this happen if i use software own proxies. IF i load my own proxies, SEEMS to use them.

-Chatbot: works but we can apparently use just one socks for all accounts, we should be able to use more proxies to avoid bans, or not?

-Followers bot: no proxies to load here, is still using no proxies to load/login all account? Not good if so, but is working anyway, just odn't feel safe to do not use proxies.

Overall is a good product but it needs some tweaks, but i still reccommend it as is solid and working, better than all others i tried.

4/5 my rating, can easily become 5/5 if Dev will explain/fix what i mentioned above

Can vouch for this coder.
Cheers
