ALBINOBOT v3

Mass Youtube Bot

Around 8 months ago I sold a basic Youtube Bot on Nulled, but was unable to manage it so I stopped selling it.

But around 4 months ago I started working on it again, and here it is.

Faster, more efficient and packed with more features than ever. This bot works by importing a list of videos and uses one or multiple accounts to perform actions on those videos. I have used it to gain over 150 real subscribers in 2 months.

Features

- AUTOMATED LIKE, DISLIKE, COMMENT AND SUBSCRIBE
 - RANDOM DELAYS TO AVOID SPAM DETECTION
 - EASY TO USE & MINIMALIST DESIGN
 - MULTIPLE ACCOUNT USE
 - LIVE PREVIEW OF PROCESS
 - PROXY USE (EARLY BETA)
 - CONSTANT UPDATES
 - VIDEO SCRAPER
- + BONUS GUIDE ON METHODS TO GAIN HUNDREDS OF SUBSCRIBERS USING THIS BOT
-

\$15 USD LIFETIME + UPDATES

[CLICK HERE TO PURCHASE](#)

A couple vouchers after the first sales ?

- DMan -

"After buying the comment bot I found on youtube, Albino was very helpful with getting me past a lot of questions I had about possible security issues and my concerns I had with downloading it. After opening and successfully installing it, he helped me figure out how to exactly use it and the program works great. No big issues so far and it runs smooth when it is working. I do recommend this for anyone looking to save some time on comments and have it done by a bot in a quick and easy manner"

- ThatBrownPotato -

"I vouch for this big time, been using the bot since 1.5 and it works perfectly. + The bonus methods he provided are fucking genius"

it keeps giving Java script errors, fix it using this code

```
WebBrowser1.ScriptErrorsSuppressed = true
```

it will ignore it

its so annoying

everything is fine just fix the java script errors
