I have a question about turkeycoders. Is someone using or using? They are reportedly UD on faceit

Dv8d - July 25, 2018, 6:20 am

I think hamcoders is UD on esea

darkbak - July 25, 2018, 6:29 am

from what I write there does not support ESEA. But it is faceit client.

they'd be ud on esea aswell if faceit client is already 'bypassed'

Silver Fang - July 25, 2018, 6:46 am

Never heard about them... would be amazing if they actually have a Faceit AC bypass.

What's the price i don't know what "TL" and it's turkish website...

That does not have to be the case tbh, our product is currently using a weak spot in the faceitac

which get us banned if we used it on esea.
So that is entirely depending on the bypass.

Do you mean you are one of the staff members the provider?
As you refer to a "weak" spot, would you imagine it to be fixed/tapped soon?

Sorry i put that wrong in a sentence! I am in no way connected to: TurkeyCoder
Was talking about our own product to make a point that if it is undetected on faceit it doesn't have to be on ESEA also depending on the bypass.

Nice advertisement mongoloid

"TURKEY"-coder.
I know muricans aren't really familiar with countries outside the 'muricah bubble but I wouldn't say that people from turkey have a great reputation when it comes to innovation and coding.
So the word "turkeycoder" already rings several alarm bells.

we aren't talking about exploiting weak spots of exact anticheat but driver based cheat, in this case both acs work very similar and if he really has bypassed main detection vector that faceit uses to beat driver based cheats it'll be esea undetected aswell

btw: if u're exploiting faceit by replacing some of the dlls csgo or other program eventually loads then it is already detected, simply they don't ban for that so fast

PingersAndMash - July 25, 2018, 1:48 pm

How do they bypass a rat on there pc not possible

That's why the company is called: TURKEYCODER.

as coding turkey as you say, it does not have much reputation. In these markets, Turkey's want to have a reputation. and encoding information according to the country can not be measured. this is completely personal.

It's a scam, they are selling Katebot as their own cheat and getting people banned.

UPDATE:

cheat doesnt work and support is horrible, he answers me probably once or twice a day and i bought the cheat 3 days ago and i havent even been able to start it.

rip to 190€? perhaps.

i'll keep u updated so if this "turkeycoder" scams, he will never get a customer again.

PingersAndMash - January 22, 2019, 11:12 am

Zooky what made you even buy it its a face any public faceit esea cheat is a scam

good question, what made me buy it is that he has a thread where he was looking for testers for his cheat and people reported the cheat working great etc.

So in my mind i thought that, perhaps this guy actually sells a real legit cheat. You learn from your mistakes.

Nevertheless i wouldnt call myself scammed yet, i will give a heads up if he refunds me or if he

helps me get the cheat working.

Still cant use the cheat, 5 days have passed without a working client, his site is down, he says it has to do with maintance. He ignores me on facebook support.

As of now i would strongly suggest that u dont buy turkeycoders cheat.

My guees is 190€ down the drain.

Yet, he still has time to refund me or actually fix my client lol, i will of course update if he does.

zooky2108 - May 8, 2019, 4:41 pm

Turkeycoder is 100% a scammer and a scummy person, do not buy from him, very obv already but just putting it out there. How could i think a TURKISH person was honest and didnt scam people LOOOOOOOL. What a fucking retard i was + others who got scammed by some 3rd worlder who can speak 3rd grade english.
