Yeah how about contact Instagram directly and explain your situation rather than coming on here and trying to get someone to hack an Instagram that probably isn't even yours (or your friends)?

Im legit talking to him right now i have all the proof in the world that it's hes account, it's a friend and he just wants access to he's instagram. That so hard to believe

I mean, you posted in the beginner hacking section- on HackForums.

As above, contact Instagram. No doubt they will recover it with details only the rightful owner knows.

Have you ever heard of people calling up a Doctors practice about penile problems, but they are 'asking for a friend', it's like that. That's why it sounds sketchy.

I know i know it sounds sketchy but i don't know how to type it to sound like it's believable but anyway yes i will let my mate contact instagram be much easier
