Thread: [\[FREE\] Build a free email marketing business in 8 weeks \(13,000 word ebook\)](#)

AngryUnicorn - July 28, 2018, 10:10 am

This one is for hustlers and go-getters... If you are one, you may want to read the below.

If you have a job or you are unemployed and you would like to give this business model a shot and grab your free ebook copy.

Learn how online entrepreneurs are creating a full-time income (or more) by starting an email marketing business.

Benefits of email marketing

- low initial startup costs (virtually free if you take advantage of free trials until you start making sales)
- less effort needed than some of the other business models (e-commerce, Amazon FBA, etc.)
- you might be able to generate your first sales within a few weeks (if you know what you're doing)
- build your business around a passion of yours
- a sense of fulfillment, e.g., career, life, etc.
- lower probability of failure than that of a traditional business due to fewer points of failure (less complex business model - you only need to do marketing)
- long-term potential (because you can build and own your email list that can be monetized for many years to come)

This business model is a little easier to succeed with since a huge part of your business is already going to be done for you. There is simply no need to source or manufacture or even produce physical products, no need to handle customer support, no fulfillment, etc.

Your job as an owner of an email marketing business just helps people out by providing your expertise about a topic you're passionate about (though there has to be plenty of demand surrounding the topic - the ebook teaches you how to ensure this) and then promoting affiliate offers for a commission. (if you're not sure how to do this, don't worry, the ebook covers it)

Are you able to recommend products to people that will help solve a problem or help achieve a goal? Well, in a nutshell, that's what you do as an email marketer when you promote affiliate products.

Have you ever helped a friend solve a problem? Well, then you might have enough knowledge about a topic that you might be able to write content about and monetize.

In the ebook you will learn how to:

- Select a market/niche (that is profitable, and meets other important criteria)
- Find and choose affiliate offers to sell to earn commissions
- Create a freebie to give away as an incentive so you could collect emails
- Build an email capture page (also known as an opt-in page where a potential subscriber has to put their email address in)
- Build an email funnel (an automated sequence of emails)

- Drive free traffic
- The above steps will get you sales if executed correctly

Why read this ebook?

- It's jargon-free
- Written for complete beginners and those who have dabbled in online marketing but haven't succeeded yet
- It is 13 000 words long (offers more detail than typical guides)

Sure, just PM me. By the way, it's not a method just so you know, this involves building a real email-based business. You will have to treat it as such.

Sure, please PM me, and I would be happy to give you a link. But beware, this is not a "method," this is an actual real business (albeit newbie friendly) that you build as an online entrepreneur. You have to have the mindset of an entrepreneur/go-getter/hustler.
