Thread: [Can you confirm this is an infected file?](#)

v3rtices - July 28, 2018, 11:55 pm

A user sent me a file, I downloaded and executed, seemed like a virus, it was detected, deleted, just curious where can I find that its a virus

File: [deleted]

VT:

<https://www.virustotal.com/#/file/2c9f1ef64d6b67253a2d78806bbafdd838074a87aee634be7a0cf40e94a679e5/detection>

Dont EXECUTE THIS, its PROBABLY A RAT.

I suggest removing the link & if someone wants to look at it, you PM them. Just to avoid you getting in shit.

It is Quasar RAT

Thank you, this adds up.
