Alpha scanner is a new online antivirus scanner created in 2018 by AlphaCoder

Our philosophy is privacy. We don't keep any data about our users and the scanned files. The files you submit us are stored locally on offline virtual machines provided with the latest versions of the main antiviruses. They will scan it, and give their result without any mean communication with their servers.

That means, no one of your files are distributed to antiviruses.
We are using the powerful ScanMyBin API to perform scans.

We also care about users anonymity so, we don't ask any identity mark, as email or name to create an account. Absolutely no logs are stored about scans, sessions, ip's of users...

GLWS !
Added you.

Don't forget to leave a feedback !

By buying Alpha Scanner, you get a free acces to all alphaproducts.online services, including ALPHA .NET CRYPTER.

Alpha_Coder - August 1, 2018, 7:35 am

I just have a question, why our nickname are same? :/

R A Z - August 1, 2018, 12:00 pm

Thank U Man , Vouch For Alpha Scanner & Crypter
i received a free license for few days
and its have Powerfull Services !
GKWS

And he changed his name from AlphaCrypter to Alpha Coder after me, btw i'm joking with him.

Securifier - August 30, 2018, 7:41 am

Scanner was down 2 days.

It is now up !

J.P.Belmondo - October 12, 2018, 2:27 pm

Your scanner is not working for me, it does not accept files.
