Some updates coming soon, Buy now!

JuJu . - July 31, 2018, 5:38 pm

Have some questions can you pm me a method of contact?

Kathbourne - July 31, 2018, 6:54 pm

I have some questions.

1. Is this software a regular application that just takes a list of email IDs and mails a certain email ?
2. Does it use many proxy settings to mail? I mean works somehow like a tor browser in the sense that it changes its IP Source often?
3. If you got a 10k Email accounts and password lists for example, is this software stable enough to handle all of those emails and logins?
4. Is it multithreaded application?

3. If you got a 10k Email accounts and password lists for example, is this software stable enough to handle all of those emails and logins?
4. Is it multithreaded application?

1. No, This application sends each account email message what's in the list.
2. No proxys or anything like that, But you can use VPN
3. Sure, But its not send messages automatic you have to select account and click send and then select other and click send
I will make it sending automatic asap.
4. This application will be multithreaded asap! (Its not slow right now, Actually pretty fast.)

(Aug 10, 2018 09:40 AM)bedahogs Wrote: [\[CITE\]](#) Does it work like mailer? or i have to insert IP like smtp?

i need something like mailer or webmail . after payment can i also get package today?Yup you can send 1 message or many, There is SMTP settings so you need only email accounts.

And yea sure you can get package today beacuse i'm home right now :)

(Aug 10, 2018 12:26 PM)Polatic Wrote: [\[CITE\]](#) Some more mailssupport like rediff/mail.ru/gmail/own smtp settings would be nice.

Also, is this HWID bounded? Is it possible to use it on other pc's?No you cant use other PC sorry. I trying get gmail SMTP work later.

Also you can set your own SMTP too.

Hello OP.

Please let me know when the emailer gets updated to send mass emails, lets say from 1m email list as I need this for future marketing. So basically I need to just type in my text, email template, my chosen link for the product and start it. But as I said I want to be sure I can leave it running in peace knowing that it is constantly going through the email list sending the email 1 by 1 to all the recipients. Thank you, just send me a PM when its implemented and Ill order straight away!

Looking forward to it buddy!

OffCode - October 23, 2018, 9:52 am

I need someone who can test my mass mailer

1) You have 200-500 email accounts: Outlook.com or Mail.com or MailRediff.com or some other working SMTP email provider

All 200-500 email accounts should be only one SMTP provider example: (Only Outlook.com accounts)

2) Trusted member

3) You get my application for free

4) I have to see when you test my application via teamviewer.

5) I dont need your email accounts.

6) Working accounts.

PM me if you have 200-500 email accounts and you can test my application :)

Zoomers - November 6, 2018, 4:09 pm

Is it possible to make accounts with this?

r1ngleader1 - November 6, 2018, 4:13 pm

If you're able to create custom emails like that.. that'd be great. Rather than just a mail bomber

OffCode - November 7, 2018, 5:41 am

(Nov 6, 2018 05:09 PM)wrathog Wrote: [\[CITE\]](#) Is it possible to make accounts with this?Nope, But i have plan to add email account creator semi-automatic.

Gon3 - November 19, 2018, 2:36 pm

DO the emails get flagged as spam? Also is this good for email marketing for a online store.

Lord Agrippa III - December 9, 2018, 10:02 pm

I did not see any place for attachments. Guess it doesn't send attachments.
