Today I was trying to buy spartan cryper, and I went to a site called: blackbayproducts.net

I found 2 interesting programs but maybe they are scams ..
The first program

WORD EXPLOIT

Public: \$ 275
Private: \$ 550

VBA MACRO EXPLOIT

Build .doc: 35 \$
Build .xls: \$ 35

Try Oday.today
That's a better site

In case they work:
Also Public = \$275 they're selling github code here obviously which will be 30/35 detected
As for private, I think they might clean it a bit with simple methods, but it will still be 7-15 detected.

Not worth it imo.

Rather use FUD macro for \$10 per build.
