Pretty solid beat. The drums are on point for the most part. I wasn't really a fan of the snare but it worked nonetheless. That synth VST (or whatever it is) you used could have had a better sound to it.. but all in all shit knocks. Keep it up

Sounds pretty amazing to me. Try getting an underground rapper to hop on this beat.

The reverb on the piano is too wet imo. Try parallel reverbs. Its taking a lot of the tone out of it giving it a muddy sound.

I feel like a lower tempo could do some justice to it too. I feel like that melody would work really well with more spacey drums and working with ambience.

Only listened on some logitech speakers but maybe giving the synth lead more stereo imaging would sound cool too. Make it real wide and encompassing.
