FREQUENTLY ASKED QUESTIONS

Spoiler ([Click to View](#)) How many computers can I use one order on?
One computer per order.

What does 'throttling' mean?

I am not certain but I think it means that the IP address has sent too many requests to Fortnite so they have temporarily blocked that IP. Combat this with more (high-quality) proxies or less threads.

OLD CUSTOMER?

[spoiler] Did you purchase the old FortniteReaper?
The new update is free, of course. View the mail address that you used to purchase old FortniteReaper and there a e-mail containing the new FortniteReaper 2.0!

Something is wrong or I want something added
Then please e-mail: support@volt.pw with the issue or suggestion!

Are there any dependencies?
You must have .NET Framework 4.5 installed.

Used the original version of FortniteReaper and I got to beta test this new version. Big vouch from me, got loads of juicy accounts.

Op also stole my bike irl.

There will probably always be some throttling exceptions, but hopefully you get plenty of accounts as well.

What theme do you use on that??

SIM-1230922 - August 10, 2018, 1:43 pm

Just released a new update.

News:Added new captures.

Fixed an issue that some were having due to a missing dependency (.NET Standard).

Bought it,

Any Sources where i can get good combos/proxys?

thanks :)

Arses - August 20, 2018, 11:14 am

Just purchased this will test it out and post my review

SIM-3971649 - August 20, 2018, 11:47 am

What exactly does this do though? Like what is this software used for in fortnite.

spudhead77 - August 20, 2018, 1:49 pm

I still haven't received the email i did email the support

zxcooneyxz - August 21, 2018, 9:50 am

How do I update this? Auto update in 2.0 isn't bringing me to download page...

Arses - August 24, 2018, 2:09 pm

Export accounts dont seem to be working for me anymore

LeSquid - September 2, 2018, 7:01 pm

Hey, looks interesting, how are you supposed to use it. I saw you imported some files. How are you supposed to get them

bustharmods - September 7, 2018, 11:20 am

bought it, browser is detecting it as a virus when downloading? whats going on?

ginsxng - September 12, 2018, 3:45 pm

is exporting working? everyone is saying its not?

Shoob - October 10, 2018, 2:16 am

works well but retries and throttling go up a lot, like 300 throttling and retries in a few minutes. 400 threads is slower than the 40 threads you put in the GIF. Could you help me with this please?

Thanks
