Requirements for being on the list:

- At least 1 year running time

- A working service

- An official platform for the service where people can speak and get feedback.

- OBS: Cheats created within 1-year will be put in the "new cheats" list

If you enjoy the thread and find it useful -> rate -> subscribe

Color rules applying:

- Cheats with last detection within 1 year will be RED

- Cheats with last detection between 1 year and 2 years will be ORANGE or if cheat only have a record history of max 1 years.

- Cheats with last detection between 2 years and 3 years will be YELLOW or if cheat only have a record history of max 2 years.

- Cheats not detected in 3 years will be GREEN

- Cheats caught actively hiding detection history, deleting pre-sale posts etc, will get a warning applied for 6 months.

Since Plexy, doesn't want to keep his thread updated anymore, here is a new one.

I'm daily checking HF, and have been doing so for almost 10 years.

Therefor I know, I can keep this thread updated.

Some of the requirements have changed. Some new rules have been applied, so providers will get a benefit from doing better, as nothing here is permanent anymore.

Have you not been detected in 3 years, you'll turn green from being able to get out of Valve's hands and stay out for a long period of time.

Please give me more information on cheats detected in MAY, as it seems there has been a vac slaughter, therefor some more of the providers listed probably needs to be updated.

GenericSkid - August 3, 2018, 5:42 pm

will vape mc C-- client get me vac banned on fortifite?

Pengers - August 3, 2018, 6:03 pm

Thank you, now I know the detections rates of being banned on Minestrike Mineplex CS:GO very much thank you ever so kindly dearly please thank you so much i love you thank you love much very you now.

sm?ked - August 3, 2018, 7:17 pm

this thread gave me cancer and i dont even care
