Big vouch for this product, received a 1 day trial and it's amazing. So far I've used the Account Creator feature with no problems. The autocaptcha works perfectly, however you do have to provide your own API key although this shouldn't be a problem as 1k captchas only cost 90 cents. Will update when I've tested other features.

(Jul 24, 2018 01:41 PM)GrandpaSherman Wrote: [\[CITE\]](#) I got some extra time to use the program to test it out, and I have to say it's one of the best tools on the market.

At only \$40 lifetime as well it sounds too good to be true, but the dev said he'll continue supporting. Account creator works well with bios and avatars, viewbot works perfect. Provides private proxies that can easily get you a stable 60+ viewers

Follow bot works, chatbot works. I don't think the whisper module works.

Overall it was an honor to get to test, and if I can find an extra \$40 to spend I know where it'll go

(Jul 30, 2018 07:24 AM)CyberKore Wrote: [\[CITE\]](#) - Account creator: works very well, but i suggest to add a STOP button.

-Views Bot:works good but i am not sure is using socks or at least is using the same socks over and over, despite it says it loaded 260 and i selected 260 proxies to be used, this happen if i use software own proxies. IF i load my own proxies, SEEMS to use them.

-Chatbot: works but we can apparently use just one socks for all accounts, we should be able to use more proxies to avoid bans, or not?

-Followers bot: no proxies to load here, is still using no proxies to load/login all account? Not good if so, but is working anyway, just odn't feel safe to do not use proxies.

Overall is a good product but it needs some tweaks, but i still reccommend it as is solid and working, better than all others i tried.

4/5 my rating, can easily become 5/5 if Dev will explain/fix what i mentioned above

Weird how a lot of these posts are of fresh accounts with 1 post created this month, assuming that

there's some sort of offer in return for these fresh users.

This looks very similar to twitch haven with a few tweaks.

glws anyways op.

The private proxies are working great, views might fluctuate because of IP bans. 80 views is great

considering you are getting this for free. (We refresh ip's daily)

"The other daily proxies" you mentioned are from a public website which you can find on the internet. They provide public proxies, they don't have anything to do with this product. (Nor we provide public proxies)

A price increase will occur in a few days.

Have a lovely day.

SIM-3971649 - August 13, 2018, 12:41 pm

I tried the free trial, and couldn't get it to work. I feel like the program needs some work. I can't deploy the bot, almost like it's missing the menus.

SpecterCraze - August 13, 2018, 1:23 pm

there is a difference between not working and do not know how to make it work, you should visit the discord and Im sure alot will help you with it

I've used enough view bots to understand how they all work. The GUI is probably messed up for me. Not showing me a complete software.

SpecterCraze - August 13, 2018, 1:46 pm

and why are you not in discord yet and be helped from top to bottom and show it works and its just an error from your side?

Went to go try the program using the 30mins free trail and saw it was disabled.

RBH - September 11, 2018, 8:14 am

I bought the program and I am trying to use the creator however it doesn't seem to save the accounts. It shows in the log that it is creating it but it doesn't actually save it in a text file or show it in the table. Now I don't know the passwords because the log doesn't show them.

The Sanity - September 16, 2018, 8:07 pm

Just to let you guys know this user has "sold" this same bot multiple times along with his other Twitch bot (last one was called Twitch Haven and there was one more before that). He exit scams every time and cancels everyone's licenses after a few months then comes back and sells the same product hoping to sell to the same group of people who need to use the tools for subs/followers/viewers.

I would make a community alert thread but I'm too lazy, someone else look up Twitch Haven and the user 'xna81425' and you'll get the story about his previous actions.

<https://hackforums.net/showthread.php?tid=5801394&pid=56703728#pid56703728>

Also suggest any staff reading this post to look into the user and compare the accounts & the bots, its obviously the same one (check his other Twitch bot thread as well).

More evidence:

<https://hackforums.net/showthread.php?tid=5764740&pid=56434327#pid56434327>

Look at all the threads TwitchHelper has created. Notice anything similar?

He follows the exact same pattern of creating a new account and instantly giving out free followers/views etc to get some reputation then starts selling his bot. He did this with his original xna account, then with Rus, and exact same thing with this one. Also note that every single bot is coded in Java, looks the same, and has the exact same features (whisper bot, chat bot, follow bot, view bot, etc). Not a single feature is less or more...if it was different products you would think its reasonable that at least 1 feature is different or missing but instead its the exact same features in the exact same order. Anyone who takes 1 minute to read through his previous accounts posts can also see it's the same person.

Pretty sure you'll all be losing access to this within a few months and a new Twitch bot will pop up again after he's banned / exit scams again, sorry to all those who already purchased.

@Staff - I suggest looking into those 3 accounts and see if there's similarities in the IPs or VPNs used, I'd be willing to bet he's either in the same subnet/using same ISP/using same VPN provider on at least 2 of the accounts.
