Thread: [BITCOIN SCRIPT - MAKE HUNDREDS DAILY -EASY FOR USE WORKING 100% \[AUTOPILOT\]](#)

Reginald Kray - August 4, 2018, 4:30 am

Offering a BTC script which is making me a couple of hundred dollars everyday.

Been using the script for 4 days already.

I let it run for 15-20 minutes than chill for some hours and I restart it.

The more money you invest in this - the more you will be making.

I suggest starting with \$35 minimum (the more you start with - the better)

You can do this worldwide and you don't need to be 18 years old or to use any specific software

This script is making 40-50\$ every 10 minutes

Price Of The Script:

50\$

BUY FROM HERE:

I tested having it running by itself while i went to sleep(got tired of the 10-20 mins circle), and its worked well to be honest, however i dont recommend anyone doing this if you are not prepared to lose your money. :)

This is my winnings for the last two days, and i still have the 50\$ i put in there making more bits as i post this ?

This is GAMBLING. Keep in mind a loss is inevitable (literally only a matter of time) even with low odds. The only way you can gain money fast is if you are also risking money. If something sounds too good to be true, it's because it is.

fjk23 - August 5, 2018, 4:48 pm

you are 100% right, if it continues to bring returns its pretty great but again gambling is gambling. But I looked at the code, its interesting. i am testing it out long term an gonna see where it goes. Ill keep you guys updated. Lol thanks bro, i just gave it a quick spin after depositing \$50...only ran it for like 3-4mins then stopped it once i hit \$55 in bits...so \$5 profit in less than 5mins is not bad hopefully i continue to have good luck lol ;)

How long would you guys recommend running the script for to see some decent profits without to

much risk?(ie,how much profit to aim for before stopping the script)

TahidJKMT - August 6, 2018, 8:22 am

Wouldnt recommend this shit to anyone

lost \$150 in less than hour

Deposited \$75 two times, lost first time lost another 75 later, cause he said you will get money back if you depo again

lol fuck this, think this is OP's site :D

MikeDin£ro - August 6, 2018, 8:40 am

Obviously im not trashing op or his script it seemed to work fine when i tried it and im currently \$5 but then again i only ran it for 3mins...and im sure the same dude that owns another big gambling site also owns this site so i dont think its op lol...da da da!...Or maybe it is lol!

TahidJKMT - August 6, 2018, 8:42 am

You can make buck yes

but you will lose

lost 140 im telling you, go fuck with \$40

make \$10

cash out but

in the end you will lose mate.

Recommend not to buy lol

Alright thought i would be fair to op and come back to post an update after giving his script a proper go...so ive ran the script 3 times, my first run i ran the script for 3mins(i was paro lol)...then the other 2 times i ran the script for 10-15mins...

So all being said Im currently in profit by \$54 which is pretty decent, so i vouch for op's script!

fjk23 - August 6, 2018, 5:02 pm

hey guys, posted another update.

Today I cashed out \$152 from running the script and following instructions

<http://prntscr.com/kfif8>

I will be talking to the seller to add a function so that all this "losing in 3 mins" can be decreased because I figured out why

you guys are losing like that. The script does not pause the bets after a certain amount of exponential losses. That is why it runs through your balance. I lost twice but again, you are supposed to secure some profits and make sure you dont run it for too long as the chances of losing are greater. Good luck

coolclass - August 6, 2018, 5:38 pm

lost money on first atteMPT, AINT DOING THIS AGAIN LOL....\$50 gone...up in flames.

Reginald Kray - August 6, 2018, 6:32 pm

You can easily make back your investment within 10 minutes of running the script

The-Noob - August 7, 2018, 2:27 am

Purchased the script but nothing in my email yet, sent you a PM to try and resolve.

EDIT: Had a play around with this and its a...well i aint too sure really. Small margin for profit and its probably better doing it manually for a faster profit.

I put £70 and with that i hit about £140, this was after around 10 mins of doing it manually and tbh its all pure luck, there is no guarantee you will make your money back right away or ever. I decided to do larger amounts and it jumped up and down for a bit before it was gone, not bothered as its just throwaway BTC that i had in a spare wallet.

Would i recommend? mmmmm not really unless you have some spare cash in the region of £50-£100 to burn away, If you hit your depositing amount then i would suggest that you just cash out and leave it unless you like the thrill of the chase which is what i enjoyed :D

Ha ha then you are unlucky than me, I am also lost \$37 but its take around 2 hours, I play 5 min per hour. First hours in 5 min I profited but then next hour all gone.

OP - maybe you can add a stop loss system.

fjk23 - August 8, 2018, 7:09 am

Glad to see that he took my advise on recoding it to stop losses after the balance reaches a certain %. I can vouch for it but you have to definitely secure your profits as I made money, withdrew it and lost at least 2 times. I'm not running it till the new script is out which current buyers should get the update. The whole reason people are losing is because it keeps increasing the bet hoping that it wins but if it's a losing streak it will blow your account. Good luck to everyone!

Raymond Reddington - August 8, 2018, 7:18 am

At the end of the day, it's still gambling. Automation doesn't make it foolproof. The house ALWAYS wins. I can see as many people making profits off your script as many as losing their investment completely. You know how it works lol.

Reginald Kray - August 8, 2018, 8:00 am

In the long turn it's possibly, but my script is designed to make short term cashouts often. That's how we make our profits :)

Just a small update :)

I deposited another 50\$ and were careful to stop the script when on a losing streak with high bets, in the end i won back the 50\$ i lost the first time plus 2-3\$, after that i cashed out in fear of getting greedy and lose it all, so im on +2-3\$ (Or minus 17-18\$ if we count the money i paid for the script.)

I will surely have some fun with it again once i get some spare btc, but for now i need the ones i have left :)

Thanks for the script OP, its good fun, but also nerve-recking at times :D

I just ran script and made like 20\$ in 10 minutes
didn't run more as instructed

but I am not sure if I am using the latest version of script
also how often can this be run in a day and at what time interval
thanks

any help from Op or the-noob is appreciated

I am in no position to give out the script and as for the time i would give it a good 45 mins before
you attempt to run it again.

I sent you request on discord but you haven't added me yet

Can you add please

hdhd - August 10, 2018, 10:45 pm

What i do(did) was basicly to watch the bets and stop the script once it reaches the 1200+ bets, cos thats when things start to go fast and once it reaches the 2400+ bets your money is gone in 20 seconds. (This method is the best if you have less than 100\$ to bet, atleast in my opinion)

If you want to let the script do all the work, you will need to have alot more than 50\$ in the game, if you have lets say 1000\$, then you can let the script run even with the high bets, and then when you hit a win it will be a big one :)

Last but not least, its all about luck, it is in no way secure or a money making method, its gambling so if you cant afford to lose the money, dont play at all, you will just get frustrated :) (Not saying this to annoy OP, just wanna make it clear as i see some people think its a easy way to make money with low or no risk)

devd - August 10, 2018, 11:36 pm

Put in 50

Made 50 profit yesterday

Today made +100

And now I'm 0

Lost everything

My balance was 25k bits equivalent to 250\$ but I still lost

The loss steak was 170

So I don't think even a 1000\$ investment can guarantee you safety!

o1nk - August 11, 2018, 1:05 am

No it doesn't guarantee you safety.

You have to know when to stop

As you have seen from my post, I made \$190.

Have I been on since?

No

The game is based on greed. If you are not greedy, you can win. If you are greedy, you will always be chasing your losses.

Yes, you literally want to spam it 24/7 and make profit

That's why I said when you are done with your round let it chill for a while

Having a decent bankroll will never lose you money with this I guarantee it

Give me discord channel link.

The-Noob - August 11, 2018, 7:09 am

My honest review about this whole thing now i have had a chance to get use to the system and the way it all plays etc.

So, after a few days of using this and making some tweaks with the OP on how to make it better and a bit safer for people, i thought i would share a screen shot of my profit made over 2 days.

The above account had a total deposit amount of about £600 maybe £650 over the past week and using the first script he released kinda lost me some money due to the way the script was designed but these earnings are with the new and updated script so if you are reading this thread thinking about trying it or following it to see how people get on then now is the time to try it!

I have had 3 accounts as this was all new to me, i think in all i am down by about another £400 but i

have made back £747 so far out of a possible £1000 that i have put in across 3 accounts.

The losses mentioned are all down to me well...80% me and 20% the script..well the older versions!

What i would do is when i would go minus in balance i would try to win it back by playing manually which is just a risky idea unless you have a really high bank role, so yeah, i kept winning but never cashed out <---- this is a key part to this!

Personally, the script will work BETTER with a higher deposit than just \$50 or \$70 but that is not to say you WONT make that back.

When you play with the script you need to run it for about 3 to 5 mins and aim for a profit margin frm the current game of around 5k bits and once you hit that number stop the script and cash out that 5k bits, reset the game stats and come back in 30 mins time, rinse and repeat.

You can honestly run it as long as you want but it's probably best to give it a half hour break before you go again.

Would i recommend this? Yes if you are OK with the possibility of losing money, if you are a bit hard up on cash then maybe skip this for now.

Big vouch, bought the script (V2) and ran it for about 2 hours, and my BTC went up from about .005 to .008

To add onto this, I'm definitely gonna cut my profits and setup either another v2, or make a purchase of V1 ?

Depends which version of the script you would like to use and how regulated you would like the risk to be
with this investment you can easily make ~5-10k really safe daily

I have run version 2 for around 15 hours and all that happened is that ive lost 330 bits ???

V1 and V1.1 was ok, but its still all about luck. (Won 200\$+ the first two days and then lost them again, doin nothing different)

This is so inconsistent, unfortunately...

I will leave V2 running for another 8-10 hours and see, but i dont have high hopes.

mic141414 - August 17, 2018, 12:29 am

lost \$35 with v2 .. had 0.00546363 went to 0.0080 in 2 hours and half .. went to eat for 20 min came back and i lost it all

lost \$50 with v1

Could you please help me recover?

hala_099 - August 17, 2018, 2:57 am

lol yeah 100% working but at the end of 24hour all my winning became all my losing I don't know but I think we can't win here bigtime already lost 100 USD in v.2 for running it for almost 22 hours I did follow all the instructions and loss bigtime

If you are investing \$50k then you can make a couple of hundred daily, maybe £300 and that's just playing for a few mins, getting up and then leaving for the day IF you try to progress and go higher i can guarantee 100% you will find your self chasing losses.

If however you are on about cashing in 50k-bits then....chances are you could hit 13k-bits first time around and then struggle to push for more and again end up chasing losses.

I have lost £1k on here, then made it back over a week and then went down £100 and back up but i did this with different methods.

The thing with this site is that it draws you in then fucks you over...like all sites.

Have a look at other people betting, some go up 2btc then plummet within mins using the same method.

Reginald Kray - August 17, 2018, 4:21 am

Hey guys, why do you greed so much ?

You let the script run for 22 hours probably you 3-4x your money by that time and yet you wouldn't cashout?

Reginald Kray - August 17, 2018, 6:45 am

You are not using it properly. There is no chance it will make you 330 bits.

Idk people are you blind? I added photo instructions with purpose. You are like the 3-4 person that doesn't use it properly

Follow the instructions and it will work perfectly

Just sent you a livestream with proof of 0.15 BTC profit on current session

Stop hating when you dont use the method right

(Aug 17, 2018 11:19 PM)linuxmasterrace Wrote: [\[CITE\]](#) please dont tell me people fall for this LMFAO

We did, and it was ok fun with the first two scripts, since they could make ok money in short time, but it is gambling so ofc you will eventually lose.

This third script, which is not a script just settings on a site,, was said to be run for 20+hours and make 10\$ an hour,, in 15 hours i lost 330bits, i stopped it and then started it again some hours later, then i went from 6k to 8k bits,, but i lost it all in about 30 mins.

When you tell OP about it, he will be like " YOU are doing it wrong, i already helped 4 people who did it wrong and they made 150\$ right after i helped them"

If you lose and you tell everyone in this thread he says "Why didnt you tell me, i would help you win it back" His "help" winning it back, is telling you to deposit more money and try again...

Last but not least, OP does NOT make any money on this, a couple of days ago had a scamreport where he was unable to refund a guy 50\$ in bitcoins for more than 2 days,,, strange when he claims to make so much easy money on this..

I call bullshit.

(Its so sad, i even vouched for his second script, it was going really well for 2 days, but when you start losing and asking questions, he changes form into a spoiled little brat and will get cocky and act like you are stupid.)

I knew this was gambling and that there was a risk to lose it all, i can afford it so its ok, but many others who bought or are temptet to buy may not have money to waste, so i dont recommend anyone buying this unless you are prepared to lose it all in very short time, yes you can be lucky, but eventually you will lose it all, so think twice.
