Thread: [\[REQ\] Needing a cool custom logo, please help!](#)

Bull Knows Best - August 4, 2018, 9:31 am

I am building a new shopping cart website/mobile app to offer great and unique/rare items at a fraction of the retail cost. I am needing a custom logo to start it out with. I am not really picky, i just want it to be cool and professional. The name of the business is below. I do need the background to be transparent (.png) and that way I can use it on many backgrounds. You can pick the colors/designs etc. It just has to fit a cool online shopping cart business so you can pick what kind of design would fit that type of business. I greatly appreciate any help with this. Thanks in advance!

DEALSIES
or
DEAL\$IE\$

If it NEEDS a tagline, you could add:

The BEST merch at the LOWEST prices, ALWAYS!

If you have any questions, don't hesitate to ask. If compensation is a must, please let me know and I could see what I could figure out, I just need something amazing made, asap!

Thanks a bunch! ?

Yo <3 I could give it a shot. Doing some free work anyway.

Can you PM me with specific colors, or base color and some examples you like around the internet. I'm also a UI designer, I can offer to design your app too !

Please do send me a PM with some examples and if possible a preview of ow your app website is going to look.

Much love !
