Thread: [Fortnite- Leaking ingame or See unreleased skins ingame](#)

Hello.

So i want to ask, if anyone know how to do method of leaking ingame or how can you see unreleased skins in game? There is some method how to do it, And its not only for leaking ingame but its for everything. Like you can change the name, give any of the skin in locker (but you see it only in lobby) or give emotes. Just you can do everything. Or program which can see active units in game etc.

Thanks for every answer ?
