Thread: [Sale of 3D Firearms & "Legal" Assault Rifle Receivers on HF](#)

SkrrtSkrtr - August 5, 2018, 2:39 am

Title is self explanatory.

Are sales of completed 3D firearms able to launch a projectile at a rate of 6500 JL's/second &/or the sale of incomplete firearm receivers allowed on the domain of Hackforums.net?

Thanks.

Trappy - August 5, 2018, 2:43 am

Idk but I'd probably buy some.

Froggy - August 5, 2018, 2:51 am

3D printed firearms are illegal in the UK and Australia, and in the US any firearm that cannot be detected by a metal detector is illegal to manufacture.

HF does not allow illegal activity. I recommend that you do not attempt to sell these items on HF.

Yshanks - August 5, 2018, 3:13 am

I'd have to say I'm not sure, but I'm sure I'll take one or two OP

mrnapolean1 - August 5, 2018, 7:06 am

I dont know but Im gonna say no its not allowed.

Any Gun purchased in the United States must be registered with your state. And since these guns are homemade, they lack the required serial numbers required for Firearm Registration. HF is a United States based Forum.

Charger - August 5, 2018, 8:34 am

Not allowed.

Just like you can't sell ammo here.

You dont know, but then go on to state a claim..... Ok.

Eagle 95 - August 5, 2018, 10:29 am

Steer clear from HF with that.
