HackForums:

I have been here for about a month but have never made a formal introduction. My name is dvlp (dl'vɛl?p?r) and I am a cybersecurity professional. You will mainly see me around the hacking section or possibly commons, but I tend to not venture out too far. Aside from cybersecurity, I am certified in computer hardware, networking, and security - just pretty much well rounded. I am also a writer so I will occasionally use this forum as a medium to generate ideas for stories. I try to keep my posts professional but am not afraid to shit talk if I'm feeling it ? and I am law-educated so I will sometimes drop some blurb. Not to mention, I love me some politics! ? HMU with a PM if you ever have a question or want to chat.

Cheers!
