Thread: [Hack steam using Steam Guard authenticator code?](#)

yenoh10 - August 6, 2018, 6:23 am

Hi! Im new here in hack forums and I want to learn how to hack a steam account just by a screenshot of the Steam guard authenticator code? My steam account was recently hacked and what the hacker did was he sent me a screenshot of my SG Auth. code, and asked me if I have one, so I unsuspectingly sent him a screenshot of my SG code. Minutes later my acct. was hacked, password changed, email changed, phone number changed and my Steam guard was removed from my account. ? I think it was cool though ? Can you teach me how? Do you have tutorials on how he did it?

That wasnt a picture u dumb, was a program (virus), linked to a fake picture.

The extension of the program was .scr I dont know why u opened it.

Oh haha, is that what he did? Yeah I was pretty dumb to believe that it was safe. The whole exchange of messages though was through facebook messenger, and I opened it on my phone. Does the .scr program works the same way on android phone?

No, Android Phones use .apk files.
