Thread: [Skype Mass Messenger / Broadcaster](#)

DamienVC - August 7, 2018, 8:00 am

I need to make an announcement on Skype, what tool is reliable and could be used? All I'm looking to is to broadcast a message around 300~ words and not to have any watermark (can buy a paid tool, np).

Let me know any suggestions.

All tools dont seem to work with the latest version, as my friend said.

Hey! Were you able to find a tool for this? Ive searched everywhere but cant seem to find anything that works well yet. I'll be willing to share the cost of the app. Let me know :)

Nopes,

Apparently ClownFish works with Skype Classic but it didn't for my purpose at least.

I don't think there are any free mass messengers for Skype currently available for latest version sadly.
