C/C++
any good source to learn how to make a crypter

you can check on the hackforums.net/forumdisplay.php?fid=5

HangMansheart - August 8, 2018, 1:42 pm

You could google everything you're asking and put some effort into that, rather than begging
everyone to give you things that don't exist.
We also need context if you want to get anywhere with crypting.

THC - August 8, 2018, 5:25 pm

Check in the [Cryptography, Encryption, and Decryption](#) section. People occasionally post free
crypter projects there, and with a bit of searching you should be able to find resources on how to
make your own crypter.

Coding a crypter is complex and not something I'd recommend unless you're good at coding. Just
sayin.
