You can also exchange your skril money to BTC however the BTC can never be sent to another btc ACC they are only stored on your skril acc you can withdraw them to your real bank whenever you want.

Skril is much better than paypal and I dont understand why people are choosing paypal over skril.

Give it a try you wont be disappointed.

Cannot use Skril, not supported in my US State, and the problem is that I tried another state then,

and it needs ID, which is from the blocked state. :D
