Just curious, I haven't really looked into it. Does .NET core require you to download it to run an app made with it(dependency)? Also, is their a GUI framework for it, winforms?

A .NET Core assembly can be compiled and shipped with the lightweight framework dependencies required for it too run. This means that it can run on a machine that does not have any form of .NET Core dependencies. As for WinForms with .NET Core, that would defeat the purpose of .NET Core being cross-platform as WinForms was designed only for Windows. If you want WinForms you might as well just go with the .NET Framework.

SIM-82498 - August 18, 2018, 6:09 pm

Looks like a promising service - I'll keep you in mind if my current programmer/developer is ever busy. Take the 5 stars mate.

Bodega - August 23, 2018, 3:45 pm

Vouch for Pitri, delivered with ease even though the site was being a nuisance at times. Thanks for the service.

Debby Ryan - August 26, 2018, 12:42 am

Best Service i have ever used. Great Work

Thank you for your excellent work

Big Vouch

Alex Belarto - August 28, 2018, 6:53 am

Can you do a reliable youtube views bot ?

B FOR BADASS - August 29, 2018, 3:01 pm

Can you code a Remote Admin Tool. If yes, let me know. I can pay via BTC. Thanks

His thread literally says no Remote Administration Tools.

Anyways OP, what wrapper would you use for creating a Discord bot?

Hi, I would like to discuss business with you. I have all the requirements which include videos of how I want the program to run. If you're interested let me know

Involves Registration, multi-threading, and registration x amount of times under that IP. Similar to eBay account creator, but for a different website. I can't pm but if you have a discord or skype let me know asap! Thanks for your time.

Ordered some development work through this guy and received an amazing project! Huge Vouch! Fast, friendly, and truly cares about his clients needs.

Anonymous_22 - January 23, 2019, 3:11 pm

Guys, if you're doubting whether to choose this coder over someone else. Look nowhere else, Pitri is seriously the best coder out there, he brings in a lot of experience compared to other guys. He will coordinate with you to ensure you get for what you asked for. If you want someone who will provide quality work, performance, and reliability. Pitri will give you those, if you're hesitant about the price, I was too but honestly, it is worth it for what you're getting. He knows the best methods, to ensure you're satisfied. Really glad that I went with this coder over someone else ~ just need couple more tweaking and it's all good to go ~!
