ITS SO FUCKING AMAZING TO SEE with glasses. I can see everything ...like I can see all the textures that I dont see. Although it's kinda annoying to have that on my big nose..

? ? ?

Well i can actually see normally. the problem with my eyes is that I have one that is god-like. and the other one is almost died(burried)

so my left eyes was doing all the works lol.

right eye is a lazy eye that could go blind if i i dont wear these. didn't go blind in a year but in few years of not wearing..it could stop working.

Damn that's no good man.

I would hate to have glasses, I have a buddy that's terribly blind but his dumb ass is always getting too damn high and losing them so he's always having to buy new pairs.

Dude spends more money on glasses than anything else ?

So you would essentially just need half of glasses.

yeah I wouldn't say 'no' to a futurist looking glasse. Like a glasse from the future. I would wear one with no hesitation.

Learning to code so I can get my ideas up in few months, maybe ill be able to get some glasse like that
