Thread: [WeLeakInfo new website is stealing ideas from me](#)

Angels Binding - August 12, 2018, 7:52 am

Thoughts on them stealing (designs) again? I'm not too happy about it.

Isn't this the exact same as haveibeenpwned .com?

yrnGarry - August 12, 2018, 8:01 am

LMFAO! Your idea was original and I saw your posts about it a few weeks back. They did actually steal this from you. Did you have any sort of protection?

843426722 - August 12, 2018, 8:10 am

they also own:

westealwebsitedesigns dot com

What kinda protection are you talking about? Like legal protection?

Yeah.

Ganja - August 12, 2018, 8:19 am

You won't be able to protect this legally.

Anyway, it's a pretty common style. Maybe they got it from you, maybe they got it from one of the thousands of other site with this style.

If they copy you, they'll always be one step behind right? No need to worry.

oRequiem - August 12, 2018, 8:56 am

It's bound to happen, they need fresh ideas so they just steal yours. Sad, but it happens.

getoutnow - August 12, 2018, 9:01 am

and you're stealing from leakedsource.com so what?

also good luck finding out who is behind weleak

They stole from leakedsource, then made their own design and are now stealing designs for me. Check the image, it's practically identical.

I probably won't be able to do anything about it, but it's sad.

It's a bit too similar in multiple aspects.

I mean, so what? They can literally take the whole theme from you and you can't do shit because it's not copyrighted.

Least they can do is link my website :D

Other than that, I think it's sad as my small website obviously can't compete with their userbase & popularity

That's how it is in today's world, can't do anything to be honest, even if you do own a bigger and better website.

"Amateurs imitate, professionals steal". It's a played out design. If they did steal it from you, then that means it's good, so you have that.

WageWolf - August 12, 2018, 10:07 am

It happens man, do you have any legal backing on this? :o

Toasties - August 12, 2018, 10:14 am

Why would somebody even bother to do this rofl!

I guess they couldn't come up with their own ideas

pmtobefriend - August 12, 2018, 1:37 pm

I like their current ones better than yours and the one they will implement to be honest.

No legal action possible on this kind of stuff anyway. It happens all the time, it's just kinda frustrating that I think of something good and they copy it.

So instead of me getting credit everyone is like: Oh wow, weleakinfo has such a nice new design/feature/whatever

It would be worse if they where using your api

Mr. Robot - August 14, 2018, 6:59 am

Except one has been around longer, if they want to take a new approach they are able to.

weleakinfo - September 28, 2018, 2:39 am

The theme being used in Dataleak.info is a popular Bootstrap 4 theme, it is sold on Bootstrap's official website. We were looking at new themes, and came across it. We have purchased a commercial license and have every right to use the theme. The theme does not belong to the original poster, but is a public paid theme.

Additionally, the original design of our website came from Oday.cat, a successor of #.io. We merged their data with We Leak Info in the beginning to create a more stronger service. I am not personally sure where Oday.cat's team got their design, but it's a bootstrap theme called Cyborg (<https://bootswatch.com/cyborg/>). If you currently go to Weleakinfo.com, you can see the Cyborg bootstrap theme in the header.

If they didn't ask permission that's low. Did you make that yourself, or did you hire someone to make it for you?

Hoodie+ - September 28, 2018, 7:27 am

You can't do shit mate, these are black waters.
