This guide is about playing a social engineering game, Scarpe will give you clear tips about set up this method etc, but let's be honest (I've never saw a honest review on HF) I wouldn't spend \$50 for this guide, in my opinion you can use free pack, public traffic sources and also earn good money. Especially in combination with SE skills. I hope that OP will not be angry at me for such a review :P

tbh it's not even a guide, he will say you a few words about method, I guess you will leave a review for 5000 words in this case :D
