Thread: [Who wants to test my private irc java bot?](#)

zeixev - August 12, 2018, 2:42 pm

So i was cleaning my harddrive and found my friends old java bot that he coded. He made it back in 2014 and it has very stable ddos functions and is still 100% FUD to this day. If anyone has an irc already setup and some loads to test it with let me know.

blackhatcat - August 12, 2018, 3:00 pm

Java malware is a meme, to be honest.

this is funny lol it put me in the twilight zone

utf-8 - August 13, 2018, 5:54 pm

Did OP just state the bot was in JAVA?! Why would you use that language.. java malware is aids

vercenta - August 13, 2018, 10:06 pm

lol java isn't half the issue.. if you even consider IRC you need to go back to toys r us for something that's not fisher price
