OP gave me a BFV code and I can confirm it's legit (it allows early access to the September beta - you can't play yet, but you will be able to a few days before everyone else).

:)

Wait what ? Thought he is selling codes for closed alpha(it ends in few days)

September beta will be open for everyone - no need to buy the game.

Nope not for the closed alpha (I wish!). It's a code for this:

Basically let's you play the open beta earlier than everyone else.
