Thread: [Twitch Subscriber Bot - Auto Subscribe - Get 100's Subscriptions /Day \[200\\$\]\[CHEAP\]](#)

fdsa4532432 - August 14, 2018, 12:26 pm

Some kids are trying to mess with our sales claiming fake shit & hate on our product.
If you don't wanna buy, simply don't.
I can show proof to anyone that seeks for it!

Twitch has disabled my old discord, feel free to pm me to get my discord again.

Some Facts -

You get a program.

This program automatically creates Twitch Prime, subscribes by a click of a button!

The program needs: 2Captcha ID, Proxies (Free ones are fine but you can use private ones).

No Refunds

Don't waste my time.

We support 2 options:

- 1) Passive mode - You Create your twitch primes manually/ buy them and than sub with all of them automatically by a click of a button! (To your channel)
- 2) Fully automated sub bot, creates twitch prime,links and does everything for you! (Also subs)

Java - September 15, 2018, 5:50 pm

The Program works as described.

You need proxies, and a 2Captcha ID Key. Free proxies work, but there is a much higher success rate with private proxies.

This is easy to use. You can have an unlimited number of instances open, meaning that you can create prime accounts very quickly. I've made over 300 in 4 hours in the past and I have heard of others making much more.

Something to note, this will eat ram. You will want a decent amount of ram if you plan on using multiple instances at once. When ram is getting full, simply close programs and run the kill file, then start them again. This is very easy to use.

If you have an account that you can sub to, this program will pay for it's self very quickly. After that the profits just start to roll in.

The program will make twitch accounts, then amazon accounts, and then link them for twitch prime accounts. Sometimes proxies are blacklisted on twitch and the creation process will fail. So, there will be inconsistencies between the number of twitch accounts, amazon accounts, and prime accounts made. With that said, it still makes twitch prime accounts decently fast.

The owner is on daily, and proves to be helpful in answering any questions, troubleshooting, and taking suggestion.

I would recommend this and can say this it does work as described.

CHAOS - September 16, 2018, 7:40 pm

I was about to buy but now i'm not so sure anymore.

I'd like to see a vouch from a TRUSTED member.

The Sanity - September 16, 2018, 7:52 pm

Just to let you guys know this user has "sold" this same bot multiple times along with his other Twitch bot (last one was called Twitch Haven and there was one more before that). He exit scams and cancels everyone's licenses after a few months then comes back and sells the same product hoping to sell to the same group of people who need to use the tools for subs/followers/viewers.

I would make a community alert thread but I'm too lazy, someone else look up Twitch Haven and the user 'xna81425' and you'll get the story about his previous actions.

<https://hackforums.net/showthread.php?tid=5801394&pid=56703728#pid56703728>

Also suggest any staff reading this post to look into the user and compare the accounts & the bots, its obviously the same one (check his other Twitch bot thread as well).

More evidence:

<https://hackforums.net/showthread.php?tid=5764740&pid=56434327#pid56434327>

Look at all the threads TwitchHelper has created. Notice anything similar?

teamnycz - September 16, 2018, 10:04 pm

Still trying to get some real help on running this.. I can't even log in! Heard some others having the same problem..

It's interesting that you gave me a negative reputation, saying "You post trash everywhere" when my only post was about this product.

This is a new account, my old account was closed for inactivity. I could have paid \$20 for them to try to reactivate it, but I didn't post much on it.

I wasn't planning on making a new account, or paying for the staff to try to reactivate my old account, until there was a constant chat about these forums amongst the customers of this product.

I understand why you got the impression you did, no hard feelings. ?

Strange because I HIGHLY doubt HackForums "tryst acan" feature would falsely link you to 10 other accounts on here.

Opera Web Browser has a built in public VPN. I am not sure how a trust scam works, but I am guessing that has something to do with it.

Hi, Taking the advice from an Admin, I have disabled Opera's VPN. Can you run the scan again, and tell me if it still says I am connected with other accounts? I am worried, since I might have registered under the VPN, disabling it might not help at this point.

It was the VPN that was doing it.
