Thread: [Forgot Password & Don't Have Email Access](#)

Surmise - August 15, 2018, 11:11 am

I reset my password a while ago and used the one that Hack Forums generated for me to log in. I've had my session saved in Chrome since then so I haven't need to log back in or re-enter the password. Since then I've moved computers and I no longer have access to the email that is linked with my Hack Forums account. So there is no way of me resetting my password or email and I can't login to my account on my new setup. I'm typing this from my old computer since this is the only way I have access.

I still have the same IP address that I've had since before I changed my password and can provide any other proof needed that I'm the account owner. Not sure if there is anything I can do on my side or if this requires staff's attention. Help is appreciated guys!

Use the recovery forum. Read the help desk for more info.

Its a stupidity mate that you don't have the password and don't have access to the email also I think you should keep the cookies on that browser safe and that's the only way for you else I do not know you can get help from <https://hackforums.net/recovery.php>
