Facebook and Instagram Account Creator

In this post i would like to introduce my facebook and instagram account creator. The bot will automatically create facebook and instagram account for you using supported email providers. To leave it overnight you can use shell script which is included in source codes. Skype: token.duemon2
[Video: <https://vimeo.com/285253066>]

The following email providers are supported:

*mail.ru (inbox.ru, list.ru, bk.ru)

*gmx.com

*hotmail.com (outlook.com)

Main features:

*multithreaded account creator

*accounts are filled with random data

*saving an additional information about accounts: first name, last name, sex, birth day etc

*accounts export in CSV format

*Email verification

*No proxy support. (You are going to use lte connection which is safe for facebook and instagram account creation.)

Price

\$2000

-Payment Methods-

Bitcoin

Amazon Gift Card

Terms Of Service:

1. I will not go first under any circumstances. (Selling creator with source codes)
2. If you seem to find me not trusted enough please don't bother asking to go first.
3. I can't accept Paypal payments because paypal is forbidden in my country.
4. All sales are final no refunds.
5. Post on thread or PM me to Buy it.

Threads limited because facebook is not allowing to create more than 5 accounts on same ip address. This creator is working with lte connection. If it's a simple webdriver bot, please develop your facebook creator for hackforums community. It's impossible to create 1000+ facebook accounts at once. Even private proxies are not working with facebook. I'm waiting your webdriver bot, please let me know when you are ready.

Also i have non-pva account service. I am selling non-pva facebook account for \$0.25 with email and password. The bot price is high because of this. (Zynga chip suppliers buying fb accounts at this rate.)

Dude i tried stormproxy's residential ips. It goes checkpoint everytime. Can you please show me how to create fb with residential ips? I created more than 400 k facebook account for zynga bot with lte connection. I have 50 raspberry pi and 3g modem for this system. Why should i spend lots of money if residential ips works for fb? Please don't comment if you dont have knowledge about something.
