Thread: [Cop It | SUPREME BOT >> \\$29 \[30% DISCOUNT FOR HF\]](#)

chlec - August 16, 2018, 7:40 am

Hello everybody!

Recently I build a Supreme Bot (for <http://supremenewyork.com>). And I released it for free on GitHub and HF and I had more than 2000 downloads.

It's a great bot which use private algorithms and connected to a fast server to know the perfect instant to cop the item you want without getting a card declined.

Now, I decided to sell it. The licence cost \$29 for lifetime. You can get lot of more with only one drop by reselling.

The bot is available here: <https://copit.fr> , only 9 licences left are available at this moment

The first drop is on next Monday, and it's sick! The bot is ready for the new season.

In few weeks, the bot will be available on iOS. If you purchase the bot before you'll get the iOS version for free!

Let me know if you've questions!

Yes of course! It works worldwide.

!Gambit! - August 17, 2018, 6:54 am

does it update on every drop?

and is there captcha bypass?

chlec - August 17, 2018, 7:04 am

Yeah I maintain it, and will update if needed on every drop.

Captcha bypass doesn't really exist on Supreme. (because they're using Google reCaptcha)

To don't have issue with captcha, I recommend you to fill some just before the drop and it will works fine!

!Gambit! - August 17, 2018, 7:18 am

alright, sounds good to me! gonna buy it and use it on the december drop with the crews. hoping to cop something.

Let me know if you have questions.

!Gambit! - August 17, 2018, 8:40 am

just 1 more question, how long does it take for the bot to put things into the cart per item? and how long on the checkout.

chlec - August 17, 2018, 9:06 am

To put items on cart, it's around 0.2s per item. The checkout is a little bit longer (~2.5s), because it simulates a true user behavior.

!Gambit! - August 17, 2018, 9:12 am

alright sounds good, could you hold on to one license for me? cus i need to transfer money from paypal to my card.

Before each drop, the bot connect to a server to know the perfect time to start cop (you can't get IP ban with this, with Forcecop you can).

We use a totally different algorithm to add element to cart and for process the checkout.

You have access to the all restocks for your region in realtime.

We have many different features:

Does it checkout faster than forcecop?

Also has this bot been successful for any other seasons?

Thanks im very interested

Edit:

How does it do with captchas and can it be ran while im not on the computer?

Hey last question sorry, i hope you can answer them in order

I watched your video on youtube and was wondering what cop threads means?

chlec - August 19, 2018, 10:19 am

Depends on the internet speed, but yeah it should cop faster (due to our differents algorithms).

I made the first version for SS17 and yeah it was successful.

For the captcha, I recommand you to fill some before the drop and it will be perfect. You can also run it while you are not on your computer with the "Automatic start when items list is updated" feature.

For example, if you put threads to 4, you'll have 4 tabs open with the supreme page trying to cop the same items. If by example, the website crash in one tab, you'll have 3 more chances to get your items.

theoldbrit - August 19, 2018, 10:36 am

I was about to buy it till i noticed you dont support mac yet. What a bummer, I have a macbook anyway of getting around this? Unless you have a different version for macs

Can vouch for this. Bought it and the download link in email didn't work

chlec - August 20, 2018, 1:41 am

Still doesn't work guys ?

Bodega - August 20, 2018, 1:44 am

Just copped, I need me this madonna tee so hopefully I cop :p

raumdeuter - August 20, 2018, 3:18 am

Users of this bot, how did it work?

chlec - August 20, 2018, 3:22 am

Cop the black madonna tee for me. It was a little bit hard because Supreme changed many things in their codes so I had to do some things manually to cop... So now the bot will be perfect for next drop.

I fixed some things! The bot is now ready for the US Store ?

The bot just sat there on Supreme's page and didn't do anything, so I had to go manual and got two shirts.

Tunechi - August 21, 2018, 9:13 am

Mine sat as well, I had to use another bot.

chlec - August 22, 2018, 5:04 am

Do you use the last update of the bot? It works nice for me.

Will update soon by improving stability for the next drop.

Are you on the UK or the US store? Please right click on the window, then click on "Inspect Element", go to "Console" and tell me if you have an error. If yes, please send me a screenshot by PM.

That's not true. You can't get IP ban no matter what bot you use. Why mislead people who don't know what they're getting into? Or do you just have no idea how botting Supreme works? Either way, not a good look.

The discount code is HACKFORUMS

Just "box logo" as keywords and "white" in color.

Greeeeeen - September 12, 2018, 3:04 pm

There is an error when purchasing with the discount,

it says

'We got this error while processing your payment:

- Invalid integer: 2029.9999999999998'

would not purchase this right now as it seems to be an error code, not sure if my hard details are fine lol.

perhaps this was a legitimate error however I am unsure and as OP isn't answering I wouldn't trust until I at least get my bot.

Wespa - October 11, 2018, 9:36 am

Update to my previous post in which I shittalked this bot.

During today's drop, I managed to cop the black headband (which was sold out in 13.1 seconds EU time).

The reason I did not get the bogo last time was because it was released into a category that was not in the bot, (It was not in the tee section) I am sure it could have easily copped it if I would have placed the right category.

One thing I would like to suggest in this bot would be to add the "new" category for a guaranteed cop.

What's the success rate? Can I buy multiple of the same item with this bot?

The issue with the "new" category it that we don't have items name. But I will see what can I do.
